## Product Description

### CTM paddle for milk sampling , Mastitis Test Paddle for dairy cows , milk sampler

The test paddle was developed to sample individual quarters to determine the presence of subclinical mastitis. A cow with subclinical mastitis does not have abnormal looking milk or other clinical signs such as a swollen or painful udder. The test paddle can also be conducted on bucket and bulk tank milk samples to help determine somatic cell counts (SCC) of the entire herd.

Thickness	2.70mm
Width	140mm
Length	283mm
Net Weight	100g

#### 产品简介

Product Introduction

创普机械 Chuang Pu

Product name: Milk Sampler

Product number: HL-MP47B

Product introduction: Made of high-strength ABS material, the sampler is a milk container used to detect invisible mastitis in dairy cows. The milk component is tested after the milk is placed in the sampler to diagnose whether there is mastitis.
