Height	600mm
Net Weight	8.30kg

- ✓ Strong carrying capacity
- ✓ Design science
- ✓ Protect the cow's buttocks

产品简介

Product introduction

创普机械 Chuang Pu

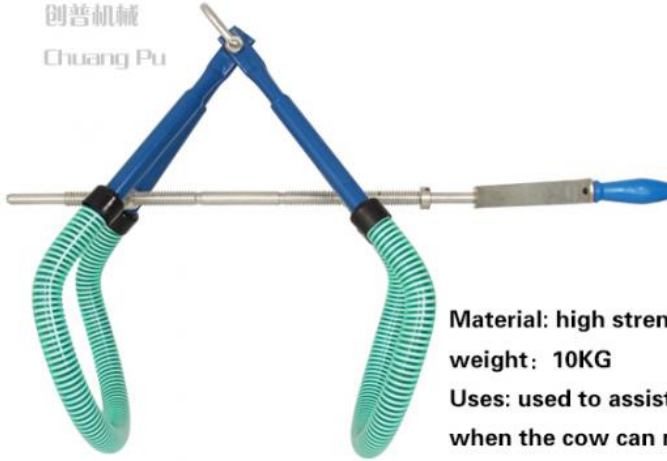

Product name: Cow Stand Support

Product number: HL-Q16

Product introduction : The stand support is a kind of machine that cattle can be easily lifted by the use of traction, loading and unloading machines, triangular hoists, etc. when the cattle are fallen, and is suitable for dystocia, severe typhoid fever, fever and other symptoms. The product is made of high-strength iron and steel rods, can carry a weight of 1000KG, and has a rubber tube to protect the cow's buttocks. It is convenient to adjust the spacing by turning the handle.

创普机械
Chuang Pu

Material: high strength iron, steel rod

weight: 10KG

Uses: used to assist the standing
when the cow can not stand

Installation

First install one end
of the column angle

Install the other end
of the column

Use wire to assist the
column to close together
and insert bolts to lock

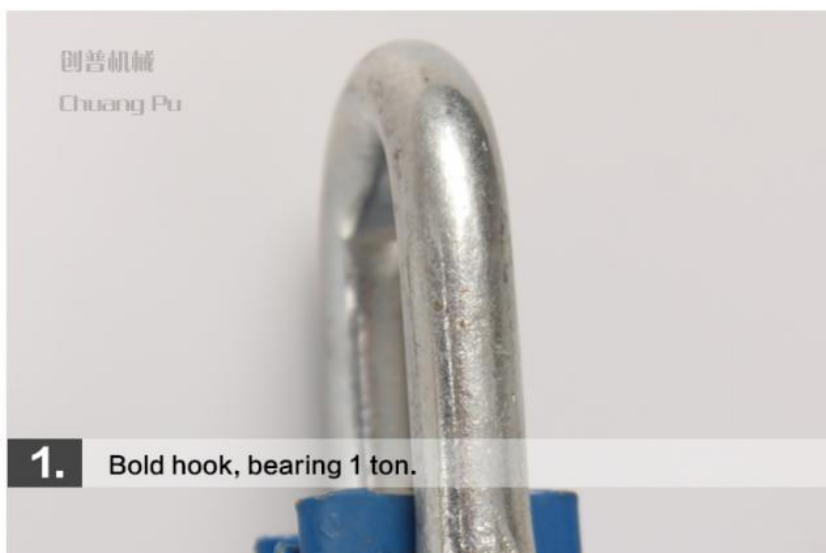

Insert handle

The installation is
complete

Product Manual

Place the stand support to the same width as the burdock and place the burdock position. Then shake the stand handle to make it clamp the burdock and lift the cow through the traction equipment. It should be noted that the cow can not be lifted for more than 3 hours to avoid the congestion of the burd bone.
