Product Description

Animal Hoof Plier 45# Steel Shoeing Pliers For Dairy Cow , 440mm Length

Product Model Number: HL-Q7

Product Name: Multifunction Hoof Trimming

Product Material: 45#Alloy Carbon Steel

Description:

The type of cow hoof disease include rot disease, hoof deformation, hoof inflammation, hoof dermatitis, finger between the neonatal, hoof erosion and hoof trauma and so on.

In the above-mentioned hoof disease, rot disease and hoof deformation is the most common.

The gripper is used to cut the hoof tip and the tip of the hoof wall, clear the hoof at the end of the filth.

It can control dairy cow disease effectively , protect the dairy cows health!

Feature:

This product is made of high strength 45 # refined carbon steel,

forming carbon steel pressure treatment, surface treatment black, shoe repair professional design.

Excellent texture, the use of light, not afraid to fall, not easy to crack, sharp knife sharp, quick repair hooves, save time and effort.

It's a good helper for pasture friends.

Item	Multifunction Hoof Trimming
Material	45#Alloy Carbon Steel

Product name: Multi-functional Shoeing Pliers

Product number: HL-Q7

Product introduction: The Multi-functional Shoeing Pliers are used to cut off the horns of the hoof and the edge of the tip hoof wall to remove the horny sputum, to effectively prevent the cow's hoof disease and protect the health of the cow. This product is pressed and formed by 45# carbon steel, and the surface is blackened. It is designed for hoof repair and has excellent texture. It is light, not afraid of falling, not easy to crack, sharp edge, quick hoof repair, saving time and effort.

The importance of hoof trimming

The foot trimming is to cure the cow. Hoof disease is a common disease in cattle farms. The sick cows will not stand straight and the knees will bend to reduce the stress and relieve the pain. In this way, the cow becomes a yak, because the pain will make the cow's appetite weak and reduce the diet. Over time, the cow will become thinner and thinner, the milk production will be less and less, and the whole resistance will decrease. At this time, it is necessary to treat the cow by repairing the hoof, and clean up the parts of the decay and necrosis in time to cure the condition of the cow. Therefore, it is very important to do "nail beauty" for cow.

Spot of the trim hoof
