## Product Description

### Cattle foot bath, dairy cow foot baths, plastic livestock hoof bath, hoof care

Thrush and an overgrowth of yeast are often behind a case of foot rot in cattle and other livestock. Foot rot in cattle and all livestock needs to be taken care of as soon as possible. Sheep foot rot can happen if the sheep are pastured in muddy fields. Standing in mud while grazing leads to the perfect conditions for foot rot. Goats kept in areas where they have no dry spot to stand often get thrush. The hooves have a distinctive, unpleasant odor. The animal may become lame from the inflammation caused by bacteria and yeast. Even poultry can suffer from illness relating to thrush and yeast overgrowth. Since we cannot control the weather, and many of us cannot add dry pasture land during the rainy season, how do we treat and care for animals with foot rot?

Product Name: goat and sheep foot bath

Product Function: As well known that, animals' hoof disease is one of the main factors that cause the milk production reducing, this foot bath, with excellent design, fulling of disinfectant, be put in milking hall entrance or barn entrance, can effectively treat foot rot, foot back part decay and other hoof disease.

Product Features: with enough wall thickness, be made with medium density polyethylene, won't corrode. The ridges at the bottom can stretch an animal's hooves, keep foot have a good contact with disinfectant.

Precautions: Avoid deformation caused by high temperature exposure.

Model	HL-Q21A
Item	Goat Foot Bath
Material	PE
Application	For Goat Hoof Medicated Bath
Weight	5.3KG
Size	1160x510x180mm
