Product Description

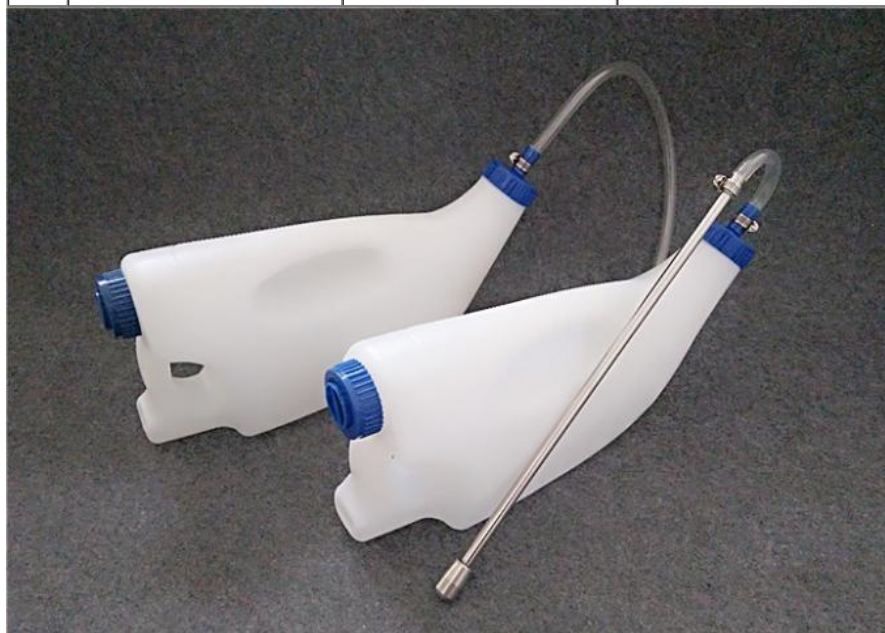

Calf drencher, 4000ml calf drench bottle with SS pipe, oral calf feeder with smooth speedy

Description:

Oral Calf Drencher is a familiar style of semi-rigid container has a screw-on cap with a plastic esophageal probe with a rounded end cap.

Drenching a calf is the process of administering liquids to a calf via the mouth. Livestock producers find this method a quick manner to give medications to a calf. Using drench devices takes less skill than passing a stomach tube through the esophagus and into the stomach.
