The importance of hoof trimming

The foot trimming is to cure the cow.Hoof disease is a common disease in cattle farms.The sick cows will not stand straight and the knees will bend to reduce the stress and relieve the pain.In this way,the cow becomes a yak,because the pain will make the cow's appetite weak and reduce the diet.Over time,the cow will become thinner and thinner,the milk production will be less and less,and the whole resistance will decrease.At this time,it is necessary to treat the cow by repairing the hoof,and clean up the parts of the decay and necrosis in time to cure the condition of the caw. Therefore,it is very important to do "nail beauty" fo cow.
