### Product Description:

Calf Island **HP-MP10A** product is our patented product, which has been innovated on the original basic design. It has its own unique advantages over traditional group raising methods. It can prevent calves from sucking each other, greatly reduce the chance of contact with each other and the spread of pathogenic microorganisms, and reduce the incidence of calves. The normal service life is up to 30 years; 8mm thick steel bar, three-piece split design, overall hot-dip galvanized, strong and not easy to rust, easy to disassemble; the product has added anti-oxidant and anti-ultraviolet UV elements, with anti-oxidation and anti-ultraviolet light function, with good heat insulation function, the temperature difference between inside and outside is about 5-8, and it will not be deformed or faded under direct sunlight.

The advantage of this new design is that many accessories are considered suitable for the overall design of this calf island, such as milk bottles and feed buckets.

### Applications:

The best shelter (calf housing) for calves, sheep and goats.
