Product Description

Cow Hoof Bath Dairy Farm Equipment 1850*800*170mm Imported Polyethylene

Product Description:

The hoofs of cattle become soft after being soaked in water, and over time, small lots will breed, which can cause hoof infections. Hoof bath is a hoof care product suitable for improving the health care of the hoof of dairy cows. The hoof bath is formulated into a liquid with a fixed concentration, and then added to the special hoof bath for cows. The cow walks through the hoof bath to complete the hoof bath. , In order to prevent the occurrence of hoof disease and care for the health of the hoof.

It is convenient to clean and disinfect the surface of the hooves, but the disinfectant can not soak the hooves close together, resulting in incomplete disinfection. To disinfect the closed part of the hooves, the method of prolonging the soaking is generally used. However, the disinfectant may damage the hooves if the immersion time is too long. For this reason, our company designed a hoof that can be completely opened by stepping on the hooves. bathtub.

Quick Detail:

Name	Model	Size	Weight	Material
Cow Hoof Bath	HL-Q21	1850*800*170mm	13.5KG	Imported Polyethylene
	HL-Q2-II	2800*900*190mm	20KG	
	HL-Q21B	1230*870*180mm	14.2KG	

Features:

- Multiple hoof bathes can be used for splicing installation
- Comes with a drain valve, which can drain the waste liquid
- There are expansion screw holes on both sides for easy fixing
- Network-like support body can effectively open the closing part of cattle hooves
- Hand-held design, easy to use and move
- Safe, tasteless, unresponsive to liquid medicine, easy to clean
- High quality imported PE integrated injection molding

Competitive Advantage:

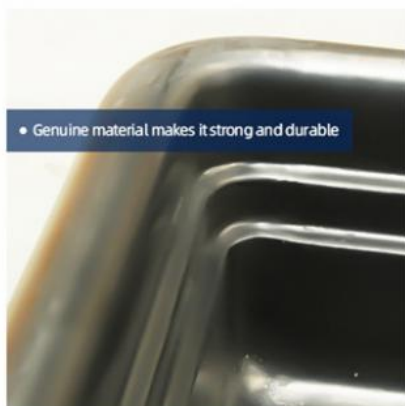

- Wide range cows farm equipment: headlock, free stall and hutch;
- Reliable quality and excellent products
- Sample is available
- Lifetime technical service support
