Product Description

Cow Drencher SS304 Cow Farm Equipment 5.65KG 158*81cm Food Grade Tube

Product Description:

The Calf fluid infusion device is a device composed of three parts: a drug pumping device, a transparent catheter and a gastric tube. The drug pumping device is connected to the stomach tube through the transparent catheter and the gastric tube is inserted into the rumen of the cow through the esophagus, and then the drug pumping device sucks the liquid. The medicine is delivered to the stomach tube and enters the rumen to complete the hydration of dehydrated cattle.
