Product Description

Efficient Dairy Parlour ACR Automatic Cluster Removal With Controller

Quick Detail:

- Automatic Cluster Remover Controller With Controller;
- Two controller be offered to choose;
- 24 Voltage, with transformer;
- Parts: control valve, cylinder, flow sensor, controller

Description:

ACR automatic cluster remover is used to control the automatic falling cup of the milking device and cleaning condition. It can directly control the pulsation frequency and massage manually or automatically.

Features:

1. Help in getting the best milk production and at the same time keeping the animal in good health.
2. This remover technique is extremely sensitive and animal-friendly.
3. Removing the milking equipment with an electronic motor saves space in the barn.
Over-milking and blind milking will be things of the past.
4. An efficient and labor-saving upgrade product;

Functions:

- Bionic Intelligent massage function;
- Adjustable milk-let-down delay;
- Milk flow monitoring with accurate sensor technology;
- Automatic sucking milk after dropping;
- Pulse adjustable function;
- Warning display function;
- Automatic or manual control function;

Applications:

The ACR automatic cluster remover be used to control the automatic falling cup of the milking device; and to control the cleaning condition of the milking equipment. It is suitable for divided-flow milking equipment and electronic measuring milking equipment;

Competitive Advantages:

- Reasonable structure and beautiful appearance;
- With good quality and reasonable price.
- One year warranty;
- Technical support;
