

Horse / Cattle Milking Machine Spares , Rubber Anti - Shock Pad Cow Mattressess

Our Product Introduction

Basic Information

- Place of Origin: China (Mainland)
- Brand Name: HL
- Certification: ISO9001: 200, ISO9001-2008
- Minimum Order Quantity: One set
- Price: Negotiation
- Packaging Details: Pallet
- Delivery Time: 15-30 days
- Payment Terms: T/T
- Supply Ability: 300sets/Month
- Warranty: One year

Product Specification

- Highlight: milking equipment parts,
cow milking machine parts

Product Description

Horse / Cattle Milking Machine Spares , Rubber Anti - Shock Pad Cow Mattressess

Quick Detail:

- Stable rubber mat upon (tortoiseshell above,flat below, nylon fabricsandwiched)
- Spongy layer (no wrapping) down for cow bedding
- Very comfortable

Description:

In milking areas it is very important for cows to walk and stand on soft floors. cow-mat's proven grip surface ensures confident walking and increased comfort, leading to greatly improved milk production. It also has sound absorption, making the cows a lot calmer and quieter.

Benefits:

- The anti-slip nature of rubber reduces injuries to cows and associated veterinary expenses or death;
- The textured upper surface offers massaging effect to the animals thus reduce fatigue and incidence of arthritis, and the grooved bottom facilitates water discharge and friction between the mat and the floor.
- Easily washed to keep the floor clean, reducing the risk of diseases, especially mastitis;
- The mat provides some insulation on the floor in cold winter, reducing the bedding cost;
- Long service life ensures higher return of investment;

Applications:

1. Horse and cattle yards and pens
2. Cattle trucks
3. Feed pads
- 4.Surface protection

Specifications:

Item NO.	HLG004
Item	Stable rubber cow mattress
Material	Nature rubber
Color	Black
Tensile Strength (Mpa)	≥2.5
Elongation(%)	≥150
Hardness(Shore A)	65+/-5
Density(g/cm3)	1.25
Length(m)	1.83
Width(m)	1.22
Thickness(mm)	17

Competitive Advantage:

1. Improves cow flow.
 - 2.Helps prevent slippage on steel and concrete platforms.
 - 3.Prevents stock injury
 - 4.Enhances cow comfort; it is a more natural choice than hard steel or concrete
 - 5.Reduces hoof wear.
 - 6.On steel platform: bolt or tek-screw.
- Sound absorbing – cows are calmer and quieter when standing on the cow mat
