

5CBM / 7CBM Mobile Vertical TMR Feed Mixer For Hay / Grass , Green

Our Product Introduction

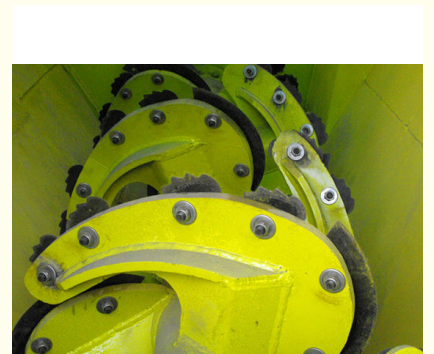

Basic Information

- Place of Origin: China (Mainland)
- Brand Name: HL
- Certification: SGS
- Service: OEM service
- Minimum Order Quantity: One set
- Price: Negotiation
- Packaging Details: Pallet
- Delivery Time: 20-40 days
- Payment Terms: T/T
- Supply Ability: 30pieces/Month

Product Specification

- Highlight: small tmr mixer , vertical feed mixer

Product Description

5CBM / 7CBM Mobile Vertical TMR Mixers For Hay / Grass , Green

Quick Detail:

- TMR = Total Mixed Ration
- Color: Green (other available)
- Capacity: 5CBM, 7CBM and 9CBM
- Type: fixed feed mixer and mobile feed mixer

Features:

1. An iron hoop was added on the top of the box to prevent processing materials from overflow so as to enlarge the volume as well as keeping the machine firm and stable.
2. The auger blade was designed lubricant free which could minimize fault rate.
3. Grade two reducer equipped which will increase torque output, minimize noise, keep the machine stable and extend the durability.
4. Electronic timer guarantees well time control of stirring.
5. Material outlet was controlled by independent hydraulic pressure so as to control the outlet volume optionally.
6. The machine was painted with enamel paint which will keep the machine from corrosion.

Description:

The ideal TMR Feeding Mixer used for hay, grass and other cow feed; it's widely used in large and medium farming.

Applications:

1. Used in cow/cattle dairy farm;
2. Used to mix coarse fodder with other additives;

Specifications:

Model Number	HL-TMR9
Item	9T TMR Mobile Feed Mixer
Moving Blade	54pcs
Fixed Blade	18pcs
Capacity	7CBM
Speed(r/min)	18
Power(kw)	22
Weight(kg)	3600
Productivity(kg/h)	3000-4500

Competitive Advantage:

1. After stirring the feed is more fluffy;
2. Greatly reduce the chance of caking feed;
3. Weighing more accurate;
4. Structure is more simple;
5. Since auger speed is slow, for the destruction of small feed
6. Easily handle large round or square bales of hay;
7. Since feed on the barrel sidewall pressure is small, the wear rate is much lower mixer;
8. Facts have proved that 85% of farmers have switched to vertical feed mixers.
