Product Description

Automatic Pail Bucket Milking Machine for Cows and Cattles Milk Sucking

Quick Detail:

- automatic milking machine milking cows
- bucket milking machine milking two cows at the same time
- automatic milk sucking machine with stainless steel silencer for reducing low noise
- dairy cow farms milking equipment is also suitable for cattles and goats / sheep milking

Descriptions:

Automatic milk sucking machine, one bucket type milking machine, is different from the mobile milking machines, it is one simple milking parlor system, and suitable for different animals milking, like cows, goats, cattle and so on. The buckets quantity for the pail bucket milking machine could be from 1 to 12, and even more. This milking machine system is equipped with one 3500L/min vacuum regulator, and has the metal material vacuum transportation pipe for air deliverring. The bucket milking machine has a long time use life, for some spare parts, like milk liner, milk tube and pulse tube, need change after one year. The operation and installing of this machine is very simple, just connecting the vacuum pump set with the milking bucket, and then could milking. The worker could operate 4-6 buckets at the same time, so this machine help people save more time and money.

Horizontal vacuum buffer tank:

- stainless steel vacuum buffer tank
- 550L vacuum pump in cast iron material
- stainless steel silencer for reducing the milking noise
- perfect oil pot oil can for the bucket milking mmachine
- 1.1kw motor power with 1400r/min motor speed

Applications:

- automatic dairy cows and cattles milking machine: the milking cup groups will be equipped with stainless steel teat cup shell, milk liner and pulse short tube, milk claw;
- automatic sheep and goat milking machine: the milking cluster group has the special silicone milk liner and plastic milk shell, also goat milk claw;
- automatic bucket milking machine is an ideal milking machine for small cowshed and goat / sheep barn;

Specifications:
