L02 Inter-Puls Pneumatic Milking Machine Pulsator , Milking Machine Spares

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HL
- Certification: ISO, CE
- Model Number: HL-P04 & HL-P04A
- Minimum Order Quantity: One piece
- Price: Negotiation
- Packaging Details: Carton
- Delivery Time: 5 -7 days
- Payment Terms: T/T, Western Union, Paypal
- Supply Ability: 1000 pieces/Month

Product Specification

- Item: Milk Pulsator
- Model: L02
- Type: Inter-puls Milk Pulsator
- Ports: 2 Ports
- Lid: Plastic Or Steel
- Theory: Pneumatic
- Highlight: **milker pulsator**, **vacuum pulsator**

Product Description

L02 Inter-Puls Pneumatic Milking Machine Pulsator , Milking Machine Spares

Quick Details:

- Item: milking machine pulsator
- Model: L02
- Model No.: HL-P04 & HL-P04A
- Type: Inter-puls milking pulsator
- Driving force: pneumatic milking pulsator
- Cover material: steel material or plastic material
- Cover color: silvery or dark blue
- Port / Exit: 2 plastic ports
- Be used for cow, cattle, sheep or goats single bucket milking machine

Description:

Milking machine pulsator, like milking machine is the key to the dairy farm equipment, is the essential part of Milking System & Milking Machine, it is the core component for the milking machine. According the different driving force, the milking machine pulsator could be divided into 2 types, Pneumatic Milk Pulsator and Electric Milk Pulsator. The milking machine pulsators have an adjustable pulsation rate to fit different animals and individual parlour vacuum conditions. It is manufactured by long lasting materials and has functions without electricity.

The Importance of Milking Machine Pulsator:

- Milk pulsator performance good or bad, directly affects the performance of the milking machine.

- Milking machine pulsator has a close connection with cow's physical health and milk production.

- The economic benefits of dairy farms also depends on the pulsator performance.

Specification:

Item	HL-P04 & HL-P04A
Model	L02 milking pulsator
Type	pneumatic milking pulsator
Pulsation Rate	60ppm
Pulsation Ratio	60/40 or 50/50
Outlet	2 plastic ports
Cover	plastic or steel
Color	dark blue or silvery
Packaging	Carton
Quantity	1PCS/Carton
Shipping	By Sea, By Train, By Air, By DHL / Fedex etc.

Features:

- Pneumatic milk pulsators are economical and more cheaper, because they do not use electricity. They are mostly used in remote locations.

- Electronic pulsators use 12V/24 V and utilize a controller transformer, they are more preciser and easy to maintain.

- The milk pulser is available in 2 outlet and 4 outlet, and the outlet tube could be plastic or stainless steel.

- Ratio is also user-selectable, according to individual needs, at 50:50, 60:40.

- Quick and simple maintenance. A complete service can be carried out in a few minutes.

Application:

The milking machine pulsator is the essential part of Milking System & Milking Machine, and it is the core component for the milking machine. Milking machine pulsator is used to control the pulsation rate and pulsation ratio during milking cows, or goats, it is important to control the milking speed.
