L02 Steel Lid Pneumatic Pulsator for Farm Milking Machine Pulsation Controlling

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: HL
- Certification: ISO, CE
- Model Number: HL-P04A
- Minimum Order Quantity: One piece
- Price: Negotiation
- Packaging Details: Carton
- Delivery Time: 5 -7 days
- Payment Terms: T/T, Western Union, Paypal
- Supply Ability: 1000 pieces/Month

Product Specification

- Item: Steel Lid Pneumatic Pulsator
- Model: L02 Steel Lid Pneumatic Pulsator
- Type: Interpulse Pneumatic Pulsator
- Ports: 2 Ports Steel Lid Pneumatic Pulsator
- Lid: Silvery Lid Pneumatic Pulsator
- Theory: Pneumatic
- Highlight: **milker pulsator**, **vacuum pulsator**

Product Description

L02 Steel Lid Pneumatic Pulsator for Farm Milking Machine Pulsation Controlling

Quick Details:
- Item: steel lid pneumatic pulsator
- Model: L02
- Model No.: HL-P04A
- Type: Interpulse pulsator
- Driving force: pneumatic pulsator
- Lid material: steel material
- Pulsator color: silvery
- Port / Exit: 2 plastic tube(vacuum tube, air tube)
- Be used for cow, cattle, sheep or goats farm milking machine

Description:
Dairy farm milking pulsator, like milking machine is the key to the dairy farm equipment, is the essential part of Milking System & Milking Machine, it is the core component for the milking machine. According the different driving force, the milking pulsator could be divided into 2 types, Pneumatic Milk Pulsator and Electric Milk Pulsator. Milking pulsators have an adjustable pulsation rate to fit different animals and individual parlour vacuum conditions. It is manufactured by long lasting materials and has functions without electricity.

The Importance of Milking Pulsator:
- Milk pulsator performance good or bad, directly affects the performance of the milking machine.

- Milking machine pulsator has a close connection with cow's physical health and milk production.

- The economic benefits of dairy farms also depends on the pulsator performance.

Specification:

Item	HL-P04A
Model	L02 milking pulsator
Type	pneumatic milking pulsator
Pulsation Rate	60ppm
Pulsation Ratio	60/40 or 50/50
Outlet	2 plastic ports
Cover	steel
Color	silvery
Packaging	Carton
Quantity	1PCS/Carton
Shipping	By Sea, By Train, By Air, By DHL / Fedex etc.

Features:
- Pneumatic milk pulsators are economical and more cheaper, because they do not use electricity. They are mostly used in remote locations.

- Electronic pulsators use 12V/24 V and utilize a controller transformer, they are more preciser and easy to maintain.

- The milk pulser is available in 2 outlet and 4 outlet, and the outlet tube could be plastic or stainless steel.

- Ratio is also user-selectable, according to individual needs, at 50:50, 60:40.

- Quick and simple maintenance. A complete service can be carried out in a few minutes.

Application:
The milking pulsator, also named milk pulsator, is the essential part of Milking System & Milking Machine, and it is the core component for the milking machine. Milking pulsator is used to control the pulsation rate and pulsation ratio during milking cows, or goats, it is important to control the milking speed.
