### Product Description:

The Cattle Hoof Care product is equipped with a drain, making it easy to dispose of the used disinfectant solution. This feature also ensures that the bath remains clean and hygienic for the next use.

A crucial component of the Cattle Hoof Care product is the Hoof Bath, which is made of high-quality PE material. The plastic Hoof Bath is soft and comfortable, ensuring that the cow's or cattle's hooves are not subjected to any discomfort or pain during disinfection.

The Cattle Hoof Care product is easy to use, and the cow or cattle can step in and out of the disinfection bath with ease. The Hoof Bath also ensures that their hooves receive equal and adequate amounts of disinfectant solution.

The Cattle Hoof Care product is an essential tool for any cattle or cow farmer looking to maintain the health and hygiene of their livestock. Using this product regularly ensures that the cows or cattle do not contract any foot diseases, which can be detrimental to their health and productivity.

### Features:

Product Name: Cattle Hoof Care

Material: PE

Weight: 13.5KG

Item: Cow Hoof Disinfection Bath

Volume: 216L

Feature:

Easy To Clean

Imported PE Material And Durable

Good Disinfection

### Technical Parameters:

Item:	Cow Hoof Disinfection Bath
Width:	800mm
Weight:	13.5KG
Volume:	216L
Material:	PE
Length:	1850mm
Depth:	170mm
Usage:	Make Hoof Disinfection For Cows And Cattle
Feature:	Easy To Clean, Imported PE Material And Durable, Good Disinfection
With Drain:	Yes

This Cow Hoof Disinfection Bath be made with especial bottom, "X" design which is comfort and safety for the cows and cattle during hoof disinfection.

### Applications:

**Farms:** The Chuangpu cattle hoof trimming tools are perfect for use in farms, especially those that rear cows and cattle. The HL-Q21 model is designed to make hoof disinfection easy and efficient, which is crucial in preventing the spread of infections and diseases.

**Veterinary Clinics:** The Chuangpu cattle hoof care tools are also perfect for use in veterinary clinics. They make it easy for veterinarians to examine and treat the hooves of cows and cattle, especially those that are suffering from hoof-related diseases.

**Ranches:** Ranchers can also benefit from the Chuangpu cattle hoof trimming tools. The HL-Q21 model is perfect for use in ranches where there are large herds of cows and cattle. It makes the process of hoof disinfection and treatment faster and more efficient.

**Agricultural Shows:** Agricultural shows are also ideal occasions for the use of Chuangpu cattle hoof care tools. They make it easy for farmers and ranchers to prepare their cows and cattle for shows, ensuring that they are in top condition.

The Chuangpu cattle hoof care tools are designed to be versatile, making them perfect for use in various scenarios. The HL-Q21 model is manufactured in China and has a width of 800mm and a length of 1850mm. It is perfect for making hoof disinfection for cows and cattle a breeze.

The Chuang Pu Cow Hoof Disinfection Bath is an ideal tool for disinfecting cows and cattle hooves. It is perfect for use in farms, veterinary clinics, and ranches. The disinfection bath is designed to ensure that the hooves of cows and cattle are clean and free from harmful bacteria and viruses. It is designed with a durable and non-slip surface that makes it easy for cows and cattle to stand on during the disinfection process.

Overall, the Chuangpu cattle hoof care tools are perfect for making hoof disinfection for cows and cattle easy and efficient. They are designed to be used in various occasions and scenarios, including farms, veterinary clinics, ranches, and agricultural shows. The HL-Q21 model is a versatile tool that is manufactured in China and has a width of 800mm and a length of 1850mm. It is perfect for use in making sure that the hooves of cows and cattle are clean and disinfected, preventing the spread of infections and diseases. The Chuang Pu Cow Hoof Disinfection Bath is also perfect for use in disinfecting cows and cattle hooves, ensuring that they are clean and free from harmful bacteria and viruses.

### Cow Hoof Bath

Product Name: Cow Hoof Bath

Product model: HL-Q21

Capacity: 216L/pc

Features:

1. High quality imported PE integrated injection molding
2. Safe, tasteless, unresponsive to liquid medicine, easy to clean
3. Network support design can effectively open the closing part of cattle hooves
4. Thicken and aggravate, anti-low temperature, anti-aging, resistance to trampling, strong bearing capacity

### PRODUCT PARAMETERS

## PRODUCT DISPLAY

## APPLICATION

Cows' hooves will become soft after being soaked in the water for a long time, and will become infected with bacteria gradually. Sanitizing liquid for cattle hooves is a hoof protection product which is suitable for improving substitute health care of dairy herds. Formulate the sanitizing liquid into a certain concentration of medicinal potion, and then full the hoof bath with hoof medicinal potion. When the cattle walks through the hoof bath, it can complete its hoof bathing, it also can prevent the occurrence of hooves disease and care for the health of the hooves. It is more convenient to clean and disinfect the surface of the hoof, but the hoof joints cannot be well impregnated by the disinfection potion, so it caused a incomplete disinfection. For disinfection of the hoof joints, the extended soaking method is generally used, but the disinfection potion may damage the hooves of the cow if the soaking time is too long. For this reason, we design a hoof bath that can be completely opened the hoof joints by simply stepping. Please put it at the entrance of the milking parlour and longitudinal placed (No hanging placed). Fill the hoof bath with hoof sanitizing liquid, the height of the liquid shall be at least 15cm.
