Product Description:

This product is made of high-quality materials that are durable and long-lasting. The clamp is designed to be used with colostrum bags that are up to 38cm in width and 41cm in length, with a thickness of 6.5cm. The clamp is easy to use and provides a secure hold on the bag, ensuring that the colostrum is thawed and sterilized properly.

The Colostrum Bag Thawing Clamp can be used in a variety of ways. It can be used as a livestock calf pour-on feeder, allowing farmers to easily administer medication and nutrition to their calves. It can also be used as a toddler cattle oral injector, providing a safe and effective way to give medicine and nutrition to young calves.

One of the key benefits of this product is its versatility. It can be used in a variety of settings, including on the farm, in the barn, or in the field. It is also easy to clean and maintain, ensuring that it will last for years to come.

Overall, the Colostrum Bag Thawing Clamp is an essential tool for any livestock farmer who wants to ensure the health and well-being of their calves. Whether you're using it as a livestock calf pour-on feeder, a toddler cattle oral injector, or a young bovine drenching tool, this clamp provides a safe and effective way to administer medicine and nutrition to your young bovines.

Features:

Name	Colostrum Bag Thawing Clamp
Usage	Fix Colostrum Bag, Place Colostrum Equipment Thawing And Sterilization
Application	For Middle Mouth Opener Colostrum Bag
Material	PP
Thickness	6.5cm
Bag Width	38cm
Bag Length	41cm

This product is a helpful tool for the Newborn Cattle Drenching Kit. It can also be used with the Toddler Cattle Oral Injector and Small Calf Intake Tube.

Applications:

Toddler Cattle Oral Injector: The Calf Drencher is ideal for administering oral medication to young calves. Its small size and precise control make it easy to give medications to even the smallest animals.

Small Calf Intake Tube: The Calf Drencher can also be used to provide nutrition to small or weak calves. Its narrow tube allows farmers to carefully control the amount of fluid being administered, ensuring that the calf gets the right amount of nutrition without overloading its system.

Baby Cow Drenching Device: In addition to medication and nutrition, the Calf Drencher can also be used to administer fluids to young calves who are dehydrated or suffering from illness. Its gentle flow and precise control ensure that the calf gets the fluids it needs without causing further distress.

Colostrum Bag Thawing Clamp: The Calf Drencher can also be used as a clamp to hold colostrum bags in place during thawing and sterilization. Its 38cm width and 6.5cm thickness make it ideal for securing bags of various sizes, while its 41cm length ensures that it can hold even large bags securely.

Whether you're a small-scale farmer or a large dairy operation, the Chuangpu HL-MP55E Calf Drencher is an essential tool for caring for your livestock. Its versatility and precision make it a must-have for anyone who wants to ensure the health and well-being of their calves.
