Product Description:

The feeding nipple comes in a bright red color that is easily visible to the calf, making it easy for them to find and suckle. The red color also makes it easy for farmers to identify the nipple during cleaning and sanitization. The valve fixed nipple is designed with a unique valve that regulates the flow of milk, ensuring that the calf gets the right amount of milk per feeding.

This Calf nursing bottle nipple is suitable for use with any standard calf nursing bottle. It is easy to install and remove, making it simple to clean and sanitize after each use. The feeding nipple's rubber material is resistant to wear and tear, ensuring that it lasts longer and saves farmers money in the long run.

Calves feeding nipple is a must-have for any farmer raising calves. It ensures that the calf gets the proper nutrition necessary for growth and development. With the valve fixed nipple, the calf can feed at its own pace, reducing the risk of overfeeding and potential health issues. Additionally, the feeding nipple's design mimics the natural feeding process, making it easy for the calf to adapt to and learn from. In conclusion, the Calf Feeding Nipple is a top-quality product that is perfect for any farmer looking to raise healthy and strong calves. Its durability, ease of use, and safety make it an excellent choice for any farm. Order now and experience the benefits of using the best feeding nipple for your calves.

This newborn bovine feeding nipple, infant bovine feeding teat, or baby cow nursing nipple is suitable for slow milk flow during calf milk feeding. The valve fixed nipple is made of rubber and manufactured by Chuangpu. The nipple has a size of 100x36mm and a red color with a top of nipple, cross opening milkout.

Applications:

The HL-MP76 calf feeding nipple is ideal for use in various scenarios such as farms, ranches, zoos, and wildlife reserves. The slow flow of the nipple makes it an excellent choice for infant bovine feeding teat, ensuring that the young animals get the right amounts of milk without choking or getting overwhelmed.

The teat is 100x36mm in size, making it a perfect fit for most calf feeding bottles. The red color of the teat makes it easy to spot, even in low light conditions, making it an excellent choice for use in busy farms or ranches.

The Chuangpu HL-MP76 calf feeding nipple is an excellent choice for heifer bottle feeding nipple. Its slow flow allows the young animals

to drink at their own pace, reducing the risk of choking and ensuring that they get the right amounts of milk. The nipple is also made of high-quality rubber material that is durable and long-lasting, making it an excellent investment for any farm or ranch. In conclusion, if you are looking for a reliable and durable calf feeding nipple, then the Chuangpu HL-MP76 is an excellent choice. It is perfect for young cattle feeding teat, infant bovine feeding teat, and heifer bottle feeding nipple. Its slow flow ensures that the young animals get the right amounts of milk without getting overwhelmed, making it an excellent investment for any farm or ranch.

The Nipple needs to be better for the baby cow

Style 5: HL-MP76
