Product Description:

The Chuangpu Calf Feeding Nipple Valve has an outer diameter of 29mm, making it a perfect fit for most calf feeding bottles available in the market. The nipple valve comes with a fixed design that prevents milk diversion and ensures that the calf gets a consistent flow of milk while feeding. The check valve feature of the nipple ensures that the milk flows only when the calf sucks on it, preventing any milk overflow or wastage.

The Milk Inlet of the Calf Feeding Nipple Valve is 10mm, allowing for a smooth and efficient flow of milk. The nipple valve is made of high-quality materials that are safe and non-toxic, ensuring that the calf stays healthy and does not get any infections or illnesses. The nipple valve is also easy to clean and maintain, ensuring that it remains hygienic and safe for the calf to use.

The Calf Feeding Nipple Valve by Chuangpu is a reliable and durable product that farmers can trust to provide their calves with the essential nutrients they need for their growth and development. The nipple valve is designed to be easy to use and comfortable for the calf, ensuring that the calf does not experience any discomfort or pain while feeding.

One of the unique features of the Calf Feeding Nipple Valve is that it comes with a valve that can cut off the milk overflow when the calf does not eat. This feature ensures that the milk does not spill or go to waste when the calf does not drink the milk.

In conclusion, if you are looking for a reliable and efficient Juvenile cow feeding teat that will provide your calves with the essential nutrients they need for their growth and development, then the Calf Feeding Nipple Valve by Chuangpu is the perfect product for you.

With its high-quality materials, innovative features, and easy-to-use design, this Calves feeding nipple valve is a must-have for any farmer who wants to ensure the health and well-being of their calves.

Features:

Product Name: Calf Feeding Nipple Valve

Name: Feeding Nipple Valve

Nipple ID: 22mm

Suitable For: Feeding Bucket Teat Fixing

Nipple Thickness: 7mm

Feature: When The Calf Does Not Eat Milk, The Valve Can Cut Off The Milk Overflow

This Calf Feeding Nipple is perfect for calf nursing bucket nipple, infant bovine feeding teat, and heifer bottle feeding nipple.

Technical Parameters:

Suitable For	Feeding Bucket Teat Fixing
Type	Check Valve, Fixed Nipple, Prevent Milk Diversion
Material	Plastic
Feature	When The Calf Does Not Eat Milk, The Valve Can Cut Off The Milk Overflow
Name	Feeding Nipple Valve
Nipple Tickness	7mm
Milk Inlet	10mm
Color	Gray
Nipple OD	29mm
Manufacturer	Chuangpu

Applications:

The valve is suitable for use in feeding bucket teat fixing, making it an ideal choice for farmers who want to ensure that their calves receive adequate nutrition. The nipple's 29mm outer diameter and 22mm inner diameter make it suitable for use with juvenile cow feeding teat. With its reliable and high-quality design, the Chuangpu HL-MP76A Calf Feeding Nipple Valve is manufactured in China, a testament to the quality and reliability of the product.

The Chuangpu HL-MP76A Calf Feeding Nipple Valve is perfect for a variety of occasions and scenarios, including farms, ranches, and other agricultural environments where newborn bovine feeding is necessary. The nipple valve is easy to use and can be inserted into the bucket teat quickly and efficiently, making it an ideal solution for farmers who want to ensure that their animals receive adequate nutrition.

In conclusion, the Chuangpu HL-MP76A Calf Feeding Nipple valve is a reliable, high-quality product that is perfect for feeding newborn bovines. Its fixed nipple and check valve features make it an ideal choice for farmers who want to ensure that their calves receive adequate nutrition. With its high-quality design and reliable manufacturing, the Chuangpu HL-MP76A Calf Feeding Nipple Valve is a must-have for any farmer who wants to ensure that their animals are healthy and well-nourished.
