Product Description:

The bucket's unique design allows for up to 12 goats and sheep to suckle milk at one time, making it an ideal Young Goat Feeder for those with multiple animals to care for. The bucket also features an anti-backflow check valve fixed nipple, ensuring that milk flows smoothly and preventing choking.

In addition to its practical design, the Steer Nurturing Pail also comes equipped with a cover, which helps keep out dust and flies, keeping the milk clean and hygienic. This feature is particularly important for young animals, which can be more vulnerable to illness and infection. Overall, the Steer Nurturing Pail is an excellent investment for anyone raising young animals. Its easy-to-clean PE material, anti-backflow nipple, and cover design make it a practical and efficient feeding solution. So, whether you're raising a single calf or a whole herd of lambs and goats, the Steer Nurturing Pail is the perfect choice for your feeding needs.

Durable:	Yes

Applications:

The product, also known as the Lamb Feeding Bucket, is a great tool for farmers looking to supplement their heifer's milk intake. Its design allows for up to 12 goats and sheep to suck milk at any given time, making it an efficient and time-saving product for farmers who need to feed a large number of young livestock.

The product is also suitable for water, which makes it an essential tool for farmers looking to support their young livestock's hydration needs. The Juvenile Cattle Bucket is designed with a cover that protects the milk from dust and flies, ensuring that the milk stays clean and hygienic for consumption. The lid function also ensures that the milk does not spill or get contaminated, which is essential for a young animal's health and growth.

The Calf Feeding Bucket is an excellent tool for farmers looking to save time and resources when it comes to feeding their young livestock. Its design and functionality make it ideal for scenarios where feeding multiple animals at once is necessary and where it's essential to maintain cleanliness and hygiene.

NIPPLE

HL-MP77

It is made of food grade materials and is clean and hygienic; When cleaning the nipple, squeeze out the remaining milk, placed in water cleaning, Weekly cleaning with acid or alkaline solution or disinfectant.

STYLE 8
