# Visual And Audio Ruminant Metal Tracer Adjustable Sensitivity For Accurate Identification

Our Product Introduction

For more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-Q12A-1
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Delivery Time: 3-5 working days
- Payment Terms: T/T
- Supply Ability: 5000PCS /Month

Metal Detector
High sensitivity/Sound and light alarm
Can work continuously for over 40 hours

Product Specification

- Weight: 0.26KG
- Detection Method: Electromagnetic Induction
- Charge Voltage: 220V 50Hz
- Detection Depth: 5-15cm
- Target Identification: Visual And Audio
- Lcd Display: No
- Length: 35cm
- Sensitivity: Adjustable
- Highlight: **Visual Audio Ruminant Metal Tracer** , **Adjustable Sensitivity Ruminant Metal Tracer** , **Accurate Identification Ruminant Metal Tracer**

Product Description:

Weighing in at just 0.26KG, the Rumen Metal Finder is lightweight and easy to handle. It is designed for farmers and livestock owners who need a reliable and efficient tool to track metallic objects inside their livestock. With this device, you can quickly and easily locate metal objects in the rumen, which can help prevent serious health issues for your animals.
The Rumen Metal Finder is primarily used for metal detection in livestock, and it is compatible with a wide range of animals, including cattle, sheep, and goats. It is a must-have tool for any farmer or rancher who wants to ensure the health and safety of their livestock.
The device operates using a charge voltage of 220V 50Hz, and it is powered by a 9V battery. This means that it is easy to charge and maintain, and it is always ready to use when you need it.
In conclusion, the Rumen Metal Finder is a highly reliable and efficient livestock metallic object tracker that is designed to make the lives of farmers and livestock owners easier. With its advanced electromagnetic induction technology and lightweight design, this device is the perfect tool for anyone who needs to track metallic objects inside their livestock. So why wait? Get your hands on the Rumen Metal Finder today and take the first step towards ensuring the health and safety of your livestock!

Features:

Product Name: Rumen Metal Detector
Lcd Display: No
Sensitivity: Adjustable
Usage: Metal Detection
Battery Type: 9V
Length: 35cm
This Cow Abdominal Metal Detector, also known as Bovine Metallic Impurity Detector or Stomach Metal Detector, is perfect for metal detection in cows.

Technical Parameters:

Cow Abdominal Metal Detector	
Livestock Metallic Object Tracker	
Rumen Metal Finder	
Feature	Power Saving, Can Work Continuously For More Than 40 Hours
Length	35cm
Charge Voltage	220V 50Hz
Battery Type	9V
Usage	Metal Detection
Detection Modes	Acousto-optic and Vibration
Sensitivity	Adjustable
Lcd Display	No
Detection Method	Electromagnetic Induction
Weight	0.26KG

Applications:

The HL-Q12A-1 Rumen Metal Detector is a battery-powered device that uses a 9V battery. It has a power-saving feature that allows it to work continuously for more than 40 hours, making it ideal for long detection periods.
The primary usage of the HL-Q12A-1 Rumen Metal Detector is metal detection in the stomach of livestock animals. It is particularly useful for detecting metallic impurities in the rumen of cows, which can cause serious harm to the animals if left undetected. The device is also suitable for detecting metallic impurities in other livestock animals, including sheep, goats, and pigs.
The HL-Q12A-1 Rumen Metal Detector is equipped with a visual and audio target identification system. The device emits an alarm sound

when it detects a metallic impurity, and the LED light on the device will light up to signal the detection. The visual and audio target identification system provides an easy way for users to determine when the device has detected a metallic impurity.

The HL-Q12A-1 Rumen Metal Detector is suitable for use in a variety of occasions and scenarios. It can be used by farmers and livestock owners to check for metallic impurities in their animals' stomachs regularly. It can also be used by veterinarians during animal health checkups to detect metallic impurities that may have been ingested by the animals. Furthermore, the HL-Q12A-1 Rumen Metal Detector can be used in meat processing plants to ensure that the meat produced is free from metallic impurities.

In summary, the Chuangpu HL-Q12A-1 Rumen Metal Detector is an essential tool for farmers, veterinarians, and meat processing plants. Its lightweight design, durable construction, and visual and audio target identification system make it an ideal device for detecting metallic impurities in the stomachs of livestock animals.

WE ALWAYS ADHERE TO RIGOROUS MANAGEMENT, THE FOUNDATION OF METICULOUS
MANUFACTURING,PRODUCE PRODUCTS THAT MEET THE MARKET'S RULES AND CUSTOMER NEEDS

Product name: Cow stomach metal detector

Product size: diameter 13.8CM, length 35CM

Product weight: 0.255KG

Usage: mainly used for metal detection in cow stomach

Product features:

1.High sensitivity, sound and light alarm at the same time when detecting metal objects, easy to use;

2.When switched on,Sound and light prompt function, about 2 seconds into the normal working state;

3.Power saving, can work continuously for more than 40 hours, voltage down to 6V, detection range unchanged;

4.When the battery voltage is seriously insufficient, it will automatically emit continuous alarm sound and red light on.
