Product Description:

Our instrument features three different needles that are suitable for various animals. The Deflation Needle for Cattle Sheep is perfect for relieving bloating in these animals, while the bloat needle for cattle is specifically designed to help exhaust the rumen of cattle. When it comes to emergency veterinary procedures, having the right tools is crucial. Our Veterinary Instrument is not only durable and long-lasting but also easy to use. The blue color makes it easy to spot in a hurry, and the stainless steel material ensures a hygienic and safe product.

Features:

Product Name: Veterinary Instrument

Length: 12CM

Material: Stainless Steel

Feature: Three Kinds Of Needle For Different Animal

Color: Blue

Application: It Is Used To Exhaust The Rumen Of Cattle. When The Rumen Bulges In Ruminants Such As Cattle, Sheep, Camels, Etc., The General Emergency Method Used Is The Rumen Puncture Method (exhaust Method)

Keywords: rumen puncture site, Gastric Exhaust Needle for Cattle, Puncture Needle for Veterinary Use

Technical Parameters:

Application	It is used to exhaust the rumen of cattle. When the rumen bulges in ruminants such as cattle, sheep, camels, etc., the general emergency method used is the rumen puncture method (exhaust method).
Needle Dia.	2mm, 3mm, 3.5mm
Feature	Three kinds of needle for different animal
Material	Stainless steel
Length	12CM
Farm Animals Type	Cattle, cow, goat, and sheep
Color	Blue

Applications:

The instrument features three kinds of needles with different diameters (2mm, 3mm, and 3.5mm) that are suitable for different animal sizes and types. The needles are made of stainless steel and are easy to sterilize to maintain a hygienic environment during the procedure. The instrument is 12cm long and has a blue color, which makes it easy to identify among other veterinary tools. The Chuangpu HL-Q8B Veterinary Instrument is an essential tool for veterinarians and animal professionals who perform rumen puncture procedures. Its reliable performance and high-quality construction make it a valuable asset in emergency situations, such as when sheep experience bloat puncture rumen, which can be life-threatening if not treated promptly. The HL-Q8B model is also ideal for performing gastric exhaust procedures in cattle, which is a standard veterinary procedure that helps relieve gas in the rumen and prevent further complications.
