Product Description:

Introducing the Pneumatic Pulsator, an essential component for efficient milking processes in farms and retail settings. This advanced Animal Pulsation Device is designed to enhance the milking experience by providing precise pulsation control.

The Pulsation Rate of this Cow Milking Pulsator is set at 60 Cycles Per Minute, ensuring optimal milking efficiency and gentle udder treatment. With a Pulsation Ratio of 60:40, this Udder Milking Pulsator offers a balanced pulsation pattern that mimics the natural milking process, promoting better udder health and milk flow.

Designed for use in Farms and Retail environments, this Pneumatic Pulsator is a versatile solution suitable for various milking setups. Its efficient Pulsation Phase, which is Alternating, ensures consistent and reliable milking performance, resulting in improved productivity and milk quality.

Whether you are a small-scale farm or a retail operation, investing in the right milking equipment is crucial for maintaining high standards of animal care and milk production. The Pneumatic Pulsator is a dependable tool that can help streamline your milking operations and optimize the milking process.
