

## Professional DL016U Milking Machine Liners for Maximum Milking Efficiency and Precision

Our Product Introduction

more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: 016U
- Minimum Order Quantity: 1 Bag
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000BAG /Month

### Product Specification

- Quantity: Pack Of 4
- Teat Cup Size: 140mm/44mm/20mm
- Installation: Simple And Quick
- Shape: Cylindrical
- Animal: Cow
- Flexibility: Flexible
- Function: Milk Extraction
- Usage: For Milking Machines

### Product Description:

The Milking Machine Liners are essential equipment for dairy farmers looking to efficiently extract milk from their cows. Designed specifically for cows, these liners are durable and reliable, capable of lasting for up to 2500 milking times. Each pack contains 4 liners, providing enough quantity to ensure smooth and consistent milk extraction.

These liners are built to a standard size, ensuring compatibility with most milking machines commonly used in dairy farms. The standard size also makes it easy to replace worn-out or damaged liners without the need for specialized fittings or adjustments.

The primary function of the Milking Machine Liners is to facilitate milk extraction from cows. These liners act as the interface between the cow's udder and the milking machine, ensuring a hygienic and efficient process. The liners are designed to gently massage the udder during milking, mimicking the natural sucking motion of a calf to stimulate milk flow.

The Milk Extraction Tubes of these liners play a crucial role in the milking process. By creating a vacuum seal around the teat, the tubes ensure a consistent and uninterrupted flow of milk from the cow's udder to the milking machine. This efficient extraction mechanism helps to maximize milk yield and minimize stress on the cows.

With a focus on durability and performance, these Milking Machine Liners are a cost-effective investment for dairy farmers. The long-lasting design means fewer replacements are needed, reducing downtime and maintenance costs. The pack of 4 liners provides convenience and value, ensuring that farmers have an adequate supply on hand for regular milking sessions.

Whether you are a small-scale dairy farmer or a large commercial operation, the Milking Machine Liners offer a reliable solution for milk extraction. The standard size and compatibility make them suitable for a wide range of milking machines, while the durable construction ensures consistent performance over 2500 milking times.

Upgrade your milking process with these high-quality Milking Machine Liners designed for cow milking. Experience efficient milk extraction, enhanced productivity, and improved milk quality with these essential dairy farming accessories.

### Features:

Product Name: Milking Machine Liners

Cleaning Method: Easy To Clean

Material: Rubber

Animal: Cow

Size: Standard

Teat Cup Size: 140mm/44mm/20mm

### Technical Parameters:

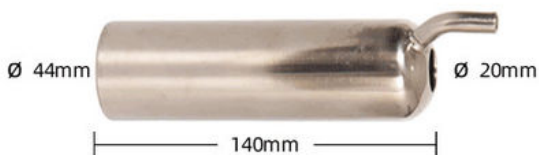

Flexibility	Flexible
Installation	Simple And Quick
Shape	Cylindrical
Function	Milk Extraction
Teat Cup Size	140mm/44mm/20mm
Design	Ribbed
Usage	For Milking Machines
Durability	Long-lasting, 2500 Milking Times
Compatibility	Fits Most Milking Machines
Material	Rubber

### Applications:

Specifically crafted for milking machines, the Chuangpu 016U liners are compatible with most models, making them a versatile option for various setups. Whether in a small-scale dairy farm or a larger commercial operation, these liners provide a reliable solution for milking cows.

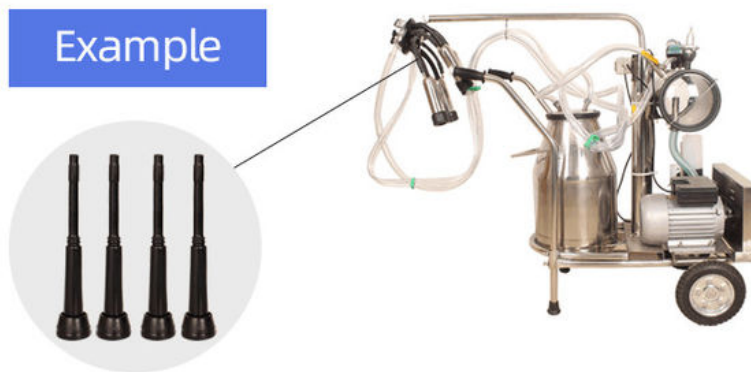

The standard size of these milking machine suction liners ensures a proper fit for the majority of milking machines on the market, simplifying the replacement process and ensuring seamless operation. The high-quality materials used in the construction of these liners guarantee a long-lasting performance, reducing the need for frequent replacement and maintenance.

Ideal for use in the livestock milking mechanism, the Chuangpu 016U milking machine liners play a crucial role in facilitating the milking process. Their compatibility with a wide range of milking machines makes them a convenient choice for dairy farmers looking to streamline their operations and enhance efficiency.
