

## Manual Pulsation Ratio Adjustment L02 Milking Machine Pulsator With 60 Cycles Per Minute Pulsation Rate

Our Product Introduction

more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P04 L02
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

### Product Specification

- Applicable Industries: Farms, Retail
- Material: Stainless Steel
- Pulsation Rate: 60 Cycles Per Minute
- Pulsation Ratio: 60:40
- Pulsation: Adjustable
- Type Of Animal: Cow, Sheep, Goat.
- Pulsation Phase: Alternating
- Type: Pneumatic
- Highlight: **Manual Milking Machine Pulsator, Manual milking pulsator, Adjustment milking pulsator**

### Product Description:

The Udder Milking Pulsator is an essential component for efficient livestock milking operations, suitable for cows, sheep, and goats. Designed with high-quality stainless steel material, this Livestock Machine Pulsator is durable and reliable, ensuring long-term performance in demanding farm environments.

With a pulsation rate of 60 cycles per minute, this Pneumatic Milking Machine Pulsator optimizes the milking process by simulating the natural sucking rhythm of young animals. The consistent pulsation rhythm helps to stimulate milk flow while preventing any discomfort or harm to the animals during milking.

The 60:40 pulsation ratio of this Milking Machine Pulsator ensures gentle and effective milking, mimicking the natural milking process. This ratio helps to massage the udder, promoting proper milk let-down and ensuring thorough milking without causing stress to the animals.

Whether you are milking cows, sheep, or goats, this versatile pulsator is designed to meet the specific needs of each animal type, providing a comfortable and efficient milking experience. Its stainless steel construction not only guarantees hygiene and easy cleaning but also offers resistance to corrosion and wear, making it a cost-effective investment for any livestock farm.

Upgrade your milking system with this advanced Livestock Machine Pulsator and experience improved milking efficiency and animal comfort. Invest in quality equipment that enhances your farm operations and promotes the well-being of your animals.

### Features:

Product Name: Milking Machine Pulsator

Type Of Animal: Cow, Sheep, Goat

Pulsation Phase: Alternating

Pulsation Rate: 60 Cycles Per Minute

Pulsation Ratio: 60:40

Item: Pneumatic Pulsator

### Technical Parameters:

Pulsation Phase	Alternating
Vacuum Ports	2 Or 4
Pulsation Rate	60 Cycles Per Minute
Applicable Industries	Farms, Retail
Pulsation Ratio Adjustment	Manual
Material	Stainless Steel
Pulsation	Adjustable
Pulsation Ratio	60:40
Type	Pneumatic
Item	Pneumatic Pulsator

### Applications:

The Chuangpu HL-P04 L02 Bovine Milking Pulsator is a reliable and efficient piece of equipment designed for use in farms and retail settings. Originating from China, this pneumatic pulsator is ideal for milking cows and other livestock animals.

With a manual pulsation ratio adjustment feature, users can customize the pulsation rate to suit their specific needs. The pulsator operates at a rate of 60 cycles per minute, ensuring a steady and consistent milking process.

Utilizing an alternating pulsation phase, the Chuangpu HL-P04 L02 is designed to mimic the natural milking rhythm, promoting better milk flow and overall udder health. This feature makes it a valuable tool for maintaining the well-being of dairy cows and maximizing milk production.

The versatility of this cow milking pulsator makes it suitable for various industries, including farms and retail establishments. Whether

used in a small-scale dairy farm or a larger commercial operation, this pulsator proves to be a valuable asset in ensuring efficient and hygienic milking practices.

Overall, the Chuangpu HL-P04 L02 Bovine Milking Pulsator is a high-quality and durable product that meets the demands of modern milking operations. Its advanced features and reliable performance make it a must-have tool for any livestock farmer looking to streamline their milking process.
