

60 Cycles Per Minute Pulsation Rate L80 Air Milking Machine Pulsator For Cow Milking Efficiency

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P04C L80 Air
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

Product Specification

- Item: Pneumatic Pulsator
- Type: Pneumatic
- Pulsation Ratio Adjustment: Manual
- Type Of Animal: Cow, Sheep, Goat.
- Pulsation Phase: Alternating
- Material: Stainless Steel
- Pulsation Rate: 60 Cycles Per Minute
- Vacuum Ports: 2 Or 4
- Highlight: Cow Milking Efficiency Pulsator, Air Milking Machine Pulsator, 60 Cycles Per Minute Pulsator

Product Description:

The Milking Machine Pulsator is an essential component for efficient dairy farming operations. Designed as a pneumatic pulsator, this equipment is suitable for use in various industries, with a primary focus on farms and retail establishments. Its versatile application makes it a valuable addition to livestock facilities and milking parlors.

As a pneumatic pulsator, this device operates using air pressure, ensuring smooth and consistent pulsation during the milking process. The Milking Machine Pulsator is specifically designed for cow milking systems, providing reliable performance and precise pulsation control.

One of the key features of this Livestock Machine Pulsator is its adjustable pulsation ratio, set at 60:40. This ratio is optimized to mimic the natural milking rhythm of cows, resulting in improved milk flow and udder health. The ability to adjust the pulsation settings allows dairy farmers to customize the milking process according to their specific needs and preferences.

With the Milking Machine Pulsator, farmers can ensure efficient and gentle milking procedures, promoting overall animal welfare and productivity. The consistent pulsation provided by this Cow Milking Pulsator helps maintain milk quality and reduces stress on the animals during the milking process.

This Livestock Pulsation Equipment is built to withstand the demands of daily milking operations, offering durability and reliability in a farming environment. Its robust construction and precision engineering ensure long-lasting performance, making it a cost-effective investment for dairy farmers.

Whether used in small-scale dairy farms or larger commercial operations, the Milking Machine Pulsator delivers consistent results and contributes to the overall efficiency of milking routines. Its user-friendly design and adjustable settings make it suitable for different herd sizes and milking setups, providing flexibility and convenience for farmers.

In conclusion, the Milking Machine Pulsator is a pneumatic pulsation device that is ideal for farms and retail establishments. With its adjustable pulsation ratio of 60:40, this Livestock Machine Pulsator offers precise control and optimized milking performance. Whether you are looking to enhance your cow milking system or improve overall milking efficiency, this equipment is a reliable choice for livestock facilities.

Features:

Product Name: Milking Machine Pulsator

Pulsation: Adjustable

Pulsation Ratio: 60:40

Type Of Animal: Cow, Sheep, Goat

Pulsation Ratio Adjustment: Manual

Type: Pneumatic

Technical Parameters:

Material	Stainless Steel
Type	Pneumatic
Pulsation Rate	60 Cycles Per Minute
Pulsation Ratio Adjustment	Manual
Type Of Animal	Cow, Sheep, Goat
Pulsation	Adjustable
Item	Pneumatic Pulsator
Applicable Industries	Farms, Retail
Vacuum Ports	2 Or 4
Pulsation Phase	Alternating

Applications:

Chuangpu's HL-P04C L80 Air Livestock Machine Pulsator is a versatile and efficient tool designed for milking operations in various farming settings. With its origins in China, this pneumatic pulsator is suitable for use with cows, sheep, and goats, making it a valuable asset for farmers and ranchers.

The Milking Machine Pulsator comes with the option of 2 or 4 vacuum ports, providing flexibility and customization based on the specific needs of the user. This feature allows for efficient milking processes, ensuring a smooth and productive workflow on the farm. Designed for use in farms and retail environments, this Ranching Machine Pulsator is ideal for both small-scale and commercial operations. Whether milking a small herd of animals or managing a larger livestock operation, the Chuangpu pulsator delivers reliable performance and consistent results.

Farmers and ranchers can rely on this Pneumatic Pulsator to streamline their milking processes, saving time and effort while maintaining the health and well-being of their animals. The durable construction and efficient design of the pulsator make it a valuable investment for any livestock operation.

With its compatibility with multiple animal types and its suitability for various industries, the HL-P04C L80 Air pulsator offers a versatile solution for milking operations. Whether used in a dairy farm, sheep ranch, or goat breeding facility, this pulsator ensures optimal milking performance and efficiency.

L80AIR pneumatic milk pulsator

Product Name: L80AIR pneumatic milk pulsator

Product Model: HL-P04C

Product Feature:

1. Two model available
2. Effective regulation of pulsation frequency for gentle milking
3. Tightly structured, airtight, strong and durable

PRODUCT PARAMETERS

Model: L80 Air **Pulsator Rate:** 60:40
Material: Plastic Shell **Exit Dia:** 9.5mm
Exits: 2 plastic **Package:** Cartons
Usage: cow/goat milking parts

Model: L80 Air **Pulsator Rate:** 60:40
Material: Plastic Shell **Exit Dia:** 9.5mm
Exits: 4 plastic **Package:** Cartons
Usage: cow/goat milking parts
