

Easy To Clean Dairy Milking System Components DL019 Milking Liner for Smooth Milking Pack Of 4

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: 019U
- Minimum Order Quantity: 1 Bag
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000BAG /Month

Product Specification

- Size: Standard
- Installation: Simple And Quick
- Usage: For Milking Machines
- Cleaning Method: Easy To Clean
- Shape: Cylindrical
- Teat Cup Size: 155mm/44mm/17mm
- Animal: Cow
- Flexibility: Flexible

Product Description:

Crafted with a ribbed design, these milking machine liners offer enhanced grip and stability during operation. The ribbed texture not only aids in maintaining a secure connection with the milking machine but also promotes better milk flow and extraction efficiency. The primary usage of these milking machine liners is for milking machines, making them an essential accessory for dairy farmers and milk processing facilities. Whether used in automated milking systems or traditional milking setups, these liners play a vital role in ensuring smooth and effective milk extraction.

In addition to their functional design, these milking machine liners are engineered to be chemical and wear-resistant. This resistance to chemicals ensures that the liners maintain their integrity even when exposed to cleaning agents and sterilization processes, prolonging their lifespan and ensuring consistent performance. The wear-resistant properties of these liners make them durable and reliable, withstanding the rigors of daily milking operations without compromising on quality.

The Milking Machine Liners, also known as milk extraction tubes or cattle teat cylinders, are a versatile and essential component for dairy farmers and milk processing facilities. Their compatibility with most milking machines, cylindrical shape, ribbed design, and chemical and wear-resistant properties make them a reliable and efficient choice for ensuring hygienic and productive milk extraction processes. Invest in these high-quality milking machine liners to enhance the performance and efficiency of your milking operations.

Features:

Product Name: Milking Machine Liners

Design: Ribbed

Compatibility: Fits Most Milking Machines

Flexibility: Flexible

Durability: Long-lasting, 2500 Milking Times

Material: Rubber

Technical Parameters:

Teat Cup Size	155mm/44mm/17mm
Size	Standard
Flexibility	Flexible
Function	Milk Extraction
Material	Rubber
Usage	For Milking Machines
Compatibility	Fits Most Milking Machines
Design	Ribbed
Shape	Cylindrical
Installation	Simple And Quick

Applications:

The Chuangpu 019U Milking Machine Liners, originating from China, are designed for use as cow milking accessories in milking machines. The liners are cylindrical in shape, made of chemical and wear-resistant rubber material, ensuring durability and longevity in demanding milking environments.

The product is ideal for various cow milking applications and scenarios, providing a reliable and efficient solution for dairy farmers. The simple and quick installation process makes it easy for users to set up and start using the liners promptly, saving time and effort during milking operations.

Whether in small-scale dairy farms or large commercial operations, the Chuangpu 019U Milking Machine Liners offer consistent performance and reliability. The resistance to chemicals and wear ensures that the liners can withstand the rigors of daily milking routines, maintaining their functionality over time.

With a focus on cattle teat cylinder functionality, these milking machine liners are specifically designed to optimize milking efficiency and comfort for both the cows and the operators. The use of high-quality rubber material ensures gentle yet effective milking, promoting animal welfare and productivity.

Overall, the Chuangpu 019U Milking Machine Liners are a dependable choice for dairy farmers looking for durable, efficient, and easy-to-use cow milking accessories. Whether in traditional milking parlors or automated milking systems, these liners deliver consistent performance and contribute to a smooth milking process.
