

## 2 Ports LE20 Electric Milking Machine Pulsator Boosting Efficiency In Milking Operations

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06A LE20
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

### Product Specification

- Model Numbe: HL-P06A
- Voltage: 24V
- Pulsation Ratio: 60:40 / 50:50
- Ratio: Adjustable
- Item: LE20 Electric Milking Pulsator
- Key Selling Points: High Productivity
- Theory: Electric
- Pulsation Control: Adjustable
- Highlight: **Boosting Efficiency Milking Machine Pulsator, 2 Ports Milking Machine Pulsator, Milking Operations Machine Pulsator**

### Product Description:

The Milking Machine Pulsator is an essential component for efficient cow milking processes. Designed with advanced features and precise control mechanisms, this pulsator ensures optimal performance and high productivity in livestock milking operations.

Key Features:

**Rate:** The Milking Machine Pulsator comes with an adjustable rate function, allowing farmers to customize the pulsation speed according to their specific milking requirements.

**Pulsation Ratio:** This pulsator offers pulsation ratios of 60:40 and 50:50, providing flexibility in adjusting the milking cycle to achieve desired results.

**Type:** It is an Interpulse type pulsator, powered by electricity for consistent and reliable performance.

**Pulsation Control:** The pulsation control feature enables users to fine-tune the pulsation settings for optimal milking efficiency and animal comfort.

With its adjustable rate and pulsation ratio options, the Milking Machine Pulsator offers farmers the ability to tailor the milking process to suit different livestock and operational needs. This level of customization ensures that each milking session is optimized for efficiency and effectiveness.

One of the key selling points of this Cow Milking Pulsator is its high productivity. By maintaining a consistent and controlled pulsation pattern, it promotes better milk flow and extraction, ultimately increasing the overall output and efficiency of the milking operation. Whether used in small-scale dairy farms or large commercial operations, the Milking Machine Pulsator proves to be a reliable and indispensable tool for modern livestock management. Its electric-powered Interpulse design ensures smooth and precise pulsation control, contributing to stress-free and efficient milking processes.

Investing in a quality Livestock Machine Pulsator like this one not only enhances the productivity of the dairy farm but also improves the well-being of the animals by providing a gentle and consistent milking experience. The adjustable features of the pulsator empower farmers to optimize their milking routines and achieve the best results for both their livestock and their business.

In conclusion, the Milking Machine Pulsator stands out as a versatile and efficient device that plays a vital role in modern dairy farming practices. With its adjustable rate, pulsation ratio options, and high productivity benefits, it is a valuable asset for any farmer looking to streamline their milking operations and maximize the yield and quality of their dairy products.

### Features:

Product Name: Milking Machine Pulsator

Use: Milking Electronical Pulsator

Type: Interpulse, Electric

Marketing Type: Ordinary Product

Ratio: Adjustable

Pulsation Ratio: 60:40 / 50:50

### Technical Parameters:

Theory	Electric
Item	LE20 Electric Milking Pulsator
Voltage	24V
Pulsation Ratio	60:40 / 50:50
Key Selling Points	High Productivity
Port	2 Or 4 Outlets
Model Number	HL-P06A
Type	Interpulse, Electric
Ratio	Adjustable
Use	Milking Electronical Pulsator

Applications:

The Chuangpu HL-P06A LE20 Bovine Milking Pulsator is a versatile and reliable milking machine pulsator designed to meet the needs of ranching operations. With its adjustable pulsation speed and ratio, this pulsator provides exceptional control over the milking process, ensuring optimal results.

Whether you are milking a small herd or a large commercial operation, the Chuangpu HL-P06A LE20 is suitable for various milking scenarios. Its 2 or 4 outlets offer flexibility in connecting to different milking units, accommodating different setups and needs. Originating from China, this electric interpulse pulsator is a durable and efficient tool for dairy farmers looking to streamline their milking process. The adjustable ratio allows for customization based on the specific needs of the herd, ensuring a gentle and effective milking experience.

Whether you are milking cows, goats, or sheep, the Chuangpu HL-P06A LE20 is an ideal choice for ranching machine pulsation. Its marketing type as an ordinary product signifies its accessibility to a wide range of users, from small-scale farmers to larger commercial enterprises.

Overall, the Chuangpu HL-P06A LE20 Bovine Milking Pulsator is a dependable and adaptable tool for various milking machine applications. Its adjustable features, durable construction, and versatile port options make it a valuable addition to any dairy operation seeking efficiency and reliability in the milking process.

LE20 Electric Milk Pulsator

- Product Name: LE20 electric milk pulsator  
Product Model: HL-P06A  
Product Feature:
- 1. Two models available
  - 2. Effective regulation of pulsation frequency for gentle milking
  - 3. Spiral base is more convenient to install and fix

PRODUCT PARAMETERS

**Model:** LE20  
**Material:** Plastic Shell  
**Exits:** 2 plastic  
**Usage:** cow/goat milking parts

**Pulsator Rate:** 60:40  
**Exit Dia:** 10mm  
**Voltage:** 24V  
**Package:** Cartons

**Model:** LE20  
**Material:** Plastic Shell  
**Exits:** 4 plastic  
**Usage:** cow/goat milking parts

**Pulsator Rate:** 60:40  
**Exit Dia:** 10mm  
**Voltage:** 24V  
**Package:** Cartons
