

Adjustable HL-P06B LE30 Milking Machine Pulsator With Pulsation Ratio 60 40 And 4 Vacuum Ports

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06B LE30
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

Product Specification

- Pulsation Control: Adjustable
- Item: LE30 Electric Milking Pulsator
- Key Selling Points: High Productivity
- Feature: Waterproof And Moisture-proof
- Rate: Adjustable
- Model Numbe: HL-P06B
- Theory: Electric
- Port: 2 Or 4 Outlets
- Highlight: 4 Vacuum Ports Milking Machine Pulsator, 60 40 Milking Machine Pulsator, Adjustable Milking Machine Pulsator

Product Description:

The Ranching Machine Pulsator is a crucial component in the dairy industry, specifically designed for udder milking. This innovative Animal Pulsation Device operates on electric theory, providing efficient and reliable pulsation for optimal milk extraction.

One of the standout features of this pulsator is its versatile pulsation ratio options. With the ability to adjust between 60:40 and 50:50 pulsation ratios, dairy farmers can customize the milking process according to their specific needs and preferences. This flexibility ensures maximum comfort for the animals and improved milk yield.

Equipped with adjustable pulsation speed settings, the Ranching Machine Pulsator allows users to regulate the speed at which the pulsation occurs. This level of control enhances the milking process by adapting to different animals' requirements, ensuring a gentle and effective milking experience.

Operating at a voltage of 24V, this pulsator is designed for optimal performance and energy efficiency. The low voltage requirement makes it suitable for various milking setups while maintaining consistent pulsation power.

Another key feature of the Ranching Machine Pulsator is its adjustable pulsation control. Farmers can fine-tune the pulsation intensity to suit the individual needs of each animal, promoting a stress-free and comfortable milking environment.

In summary, the Ranching Machine Pulsator is a reliable and versatile udder milking device that offers customizable pulsation ratios, adjustable speed settings, and voltage efficiency. With its electric theory and advanced pulsation control features, this pulsator is a valuable asset for dairy farmers looking to optimize their milking operations.

Features:

Product Name: Milking Machine Pulsator

Marketing Type: Ordinary Product

Use: Milking Electronical Plusator

Rate: Adjustable

Feature: Waterproof And Moisture-proof

Ratio: Adjustable

Technical Parameters:

Technical Parameter	Details
Marketing Type	Ordinary Product
Voltage	24V
Type	Interpulse, Electric
Rate	Adjustable
Theory	Electric
Key Selling Points	High Productivity
Pulsation Ratio	60:40 / 50:50
Port	2 Or 4 Outlets
Feature	Waterproof And Moisture-proof
Use	Milking Electronical Plusator

Applications:

The Chuangpu HL-P06B LE30 Bovine Milking Pulsator is a versatile and efficient tool designed for various milking applications in the livestock industry. With its origin in China, this pulsator model is a reliable choice for farmers looking to streamline their milking process.

The adjustable pulsation speed of the HL-P06B LE30 allows for customization according to different livestock needs, providing a comfortable and effective milking experience. Whether the user prefers a pulsation ratio of 60:40 or 50:50, this pulsator can accommodate various preferences and requirements.

One of the key features of the Chuangpu HL-P06B LE30 Electric Milking Pulsator is its 24V voltage, ensuring a stable and consistent performance during milking operations. This makes it suitable for use in different settings, from small-scale farms to larger commercial operations.

Farmers can use the HL-P06B LE30 Bovine Milking Pulsator in a range of scenarios, including daily milking routines, milking competitions, or even veterinary practices. Its reliability and efficiency make it an essential tool for any livestock operation that values productivity and animal welfare.

Whether milking cows, goats, or sheep, the Chuangpu HL-P06B LE30 Bovine Milking Pulsator provides a seamless milking experience, ensuring thorough and hygienic milk extraction. Its durable construction and user-friendly design make it a must-have for any farm looking to optimize their milking process.

LE30 Electric Milk Pulsator

Product Name: LE30 electric milk pulsator
Product Model: HL-P06B
Product Feature:
1. Two models available
2. Effective regulation of pulsation frequency for gentle milking
3. Spiral base is more convenient to install and fix

PRODUCT PARAMETERS

Model: LE30

Material: Plastic Shell

Exits: 2 plastic

Usage: cow/goat milking parts

Pulsator Rate: 60:40

Exit Dia: 10mm

Voltage: 24V

Package: Cartons

Model: LE30

Material: Plastic Shell

Exits: 4 plastic

Usage: cow/goat milking parts

Pulsator Rate: 60:40

Exit Dia: 10mm

Voltage: 24V

Package: Cartons
