

## HL-P06C-1 Boumatic Milking Machine Pulsator Improving Milking Efficiency with 10mm Vacuum Port

Our Product Introduction

more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06C-1 Boumatic
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

### Product Specification

- Weight: 725g
- Color: Black And White
- Ports: 2 Ports Electric Pulsator
- Type Of Animal: Cow, Sheep, Goat.
- Ratio: 60:40
- Theory: Electric
- Condition: New
- Use: Milking Machine System
- Highlight: **Boumatic Milking Machine Pulsator,  
Improving Efficiency Milking Machine Pulsator,  
10mm Vacuum Port Milking Machine Pulsator**

## Product Description

**Corporate HQ:** [CHUANGPU ANIMAL HUSBANDRY TECHNOLOGY\(SUZHOU\) CO.,LTD](#)

**Export Dept:** [ZHANGJIAGANG FANRS MACHINERY CO.,LTD.](#)

### Product Description:

With a sleek design in classic black and white colors, this Milking Machine Pulsator not only performs exceptionally but also adds a touch of sophistication to your milking system. The new condition of this pulsator ensures reliability and longevity, allowing you to focus on your daily milking routine without worrying about frequent maintenance or replacements.

Designed for multi-species use, this Ranching Machine Pulsator is versatile and adaptable to different types of animals, making it a valuable investment for farmers with diverse livestock. You can seamlessly switch between milking cows, sheep, and goats without the need for separate pulsators, streamlining your milking process and saving you time and effort.

The Milking Machine Pulsator is specifically engineered for use in a Milking Machine System, providing consistent and gentle pulsation to stimulate milk flow and ensure thorough milking. The 60:40 ratio of this pulsator mimics the natural milking rhythm, promoting udder health and improving overall milk yield.

Whether you are a seasoned farmer or just starting in the livestock industry, having a reliable and efficient pulsator like this one is crucial for the success of your milking operations. The ease of use and compatibility with various animals make this pulsator a must-have for any modern dairy or livestock farm.

### Features:

Product Name: Milking Machine Pulsator

Vacuum Port: 10mm

Type Of Animal: Cow, Sheep, Goat

Model Number: HL-P06C-1 Boumatic

Ratio: 60:40

Ports: 2 Ports Electric Pulsator

### Technical Parameters:

|                |                           |
|----------------|---------------------------|
| Vacuum Port    | 10mm                      |
| Ratio          | 60:40                     |
| Condition      | New                       |
| Ports          | 2 Ports Electric Pulsator |
| Theory         | Electric                  |
| Weight         | 725g                      |
| Model Number   | HL-P06C-1 Boumatic        |
| Use            | Milking Machine System    |
| Color          | Black And White           |
| Type of Animal | Cow, Sheep, Goat          |

### Applications:

The Chuangpu Milking Machine Pulsator, model HL-P06C-1 Boumatic, is a cutting-edge piece of livestock pulsation equipment that is designed to enhance the efficiency and productivity of milking processes in various farming scenarios. With its origin in China, this new pulsator boasts 2 ports for electric pulsation, offering a reliable and consistent performance.

One of the key product application occasions for the Milking Machine Pulsator is within modern dairy farms, where the pulsator plays a crucial role in the milking machine system. Its 60:40 ratio ensures optimal pulsation, leading to a gentle and effective milking process that is comfortable for the animals and efficient for the operators.

Whether in small-scale dairy operations or large commercial farms, the Chuangpu Milking Machine Pulsator proves to be a valuable asset, contributing to higher milk yields and overall farm productivity. Its advanced design and construction make it suitable for continuous use, ensuring reliable performance even under demanding conditions.

Furthermore, this pulsator is ideal for use in automated milking systems, where precision and consistency are paramount. The HL-P06C-1 Boumatic model excels in delivering the right pulsation frequency and intensity, resulting in improved milk quality and udder health.

In summary, the Chuangpu Milking Machine Pulsator is a versatile farming machine pulsator that meets the needs of modern livestock

operations. From enhancing milking efficiency to promoting animal welfare, this pulsator is a valuable tool for dairy farmers looking to optimize their milking processes.

### Electric Milk Pulsator

product name: electric milk pulsator

product Model: HL-P06C-1

Product Feature:

1. Advanced design techniques
2. Effective regulation of pulsation frequency for gentle milking
3. Tightly structured, airtight, strong and durable

### PRODUCT PARAMETERS

|                                      |                         |
|--------------------------------------|-------------------------|
| <b>Model:</b> P06C-1                 | <b>Exit Dia:</b> 10mm   |
| <b>Material:</b> Plastic Shell       | <b>Voltage:</b> 24V     |
| <b>Pulsator Rate:</b> 60:40          | <b>Package:</b> Cartons |
| <b>Usage:</b> cow/goat milking parts |                         |
