

400g Electric Milking Machine Pulsator CV30 Essential Equipment for Dairy Farmers

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06E CV30
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

Product Specification

- Port: 2 Ports
- Vacuum Ports: 9.5mm
- Packing: Carton Box
- Pulsation Ratio: 60:40
- Weight: 400g
- Type Of Animal: Cow, Sheep, Goat.
- Mounting Type: Bracket Mount
- Use: Milking Machine Plusator
- Highlight: Dairy Farmers Electric Milking Machine Pulsator , CV30 Electric Milking Machine Pulsator , 400g Electric Milking Machine Pulsator

Product Description:

The Dairy Machine Pulsator is an essential component for efficient milking processes in dairy farms and ranching operations. With a consumption rate of 260mA, this pulsator is designed to deliver reliable performance while ensuring low power usage. Weighing just 400g, it is lightweight and easy to handle, making it convenient for daily use.

Equipped with vacuum ports measuring 9.5mm, this Dairy Machine Pulsator is compatible with a wide range of milking machine setups, allowing for seamless integration into existing systems. Its versatile design and compact size make it a practical choice for various milking applications.

The primary use of this Dairy Machine Pulsator is in milking machines, where it plays a crucial role in regulating the pulsation rate to ensure efficient milk extraction. By maintaining consistent vacuum levels, this pulsator helps optimize the milking process, leading to higher productivity and better milk quality.

When it comes to packaging, the Dairy Machine Pulsator is carefully enclosed in a sturdy carton box to prevent any damage during transit. This ensures that the product reaches you in perfect condition, ready to be installed and used right away.

Whether you are operating a small dairy farm or a large-scale ranching operation, the Dairy Machine Pulsator is a reliable and efficient solution for your milking needs. Its durable construction and user-friendly design make it a valuable asset for streamlining milking processes and enhancing overall productivity.

Investing in the Dairy Machine Pulsator is a smart choice for dairy farmers and ranchers looking to optimize their milking operations. With its low power consumption, lightweight build, and compatibility with various vacuum ports, this pulsator offers the perfect blend of performance and convenience. Make the Dairy Machine Pulsator a part of your milking setup and experience improved efficiency and output in your dairy or ranching business.

Features:

Product Name: Milking Machine Pulsator

Type: Electric

Pulsation Ratio: 60:40

Vacuum Ports: 9.5mm

Use: Milking Machine Pulsator

Packing: Carton Box

Technical Parameters:

Packing	Carton Box
Consumption	260mA
Model	HL-P06E CV30
Type Of Animal	Cow, Sheep, Goat
Type	Electric
Port	2 Ports
Weight	400g
Voltage	24V
Vacuum Ports	9.5mm
Use	Milking Machine Pulsator

Applications:

The Chuangpu HL-P06E CV30 Milking Machine Pulsator is a high-quality electric pulsator designed for efficient milking processes in various livestock settings. With its origin in China, this pulsator offers reliable performance and durability, making it an ideal choice for dairy farmers and livestock owners.

Whether you are operating a small dairy farm or a larger livestock operation, the HL-P06E CV30 Milking Machine Pulsator provides

consistent and gentle pulsation for optimal milk extraction. Its low consumption rate of 260mA ensures cost-effective operation without compromising on performance.

The bracket mount design of this pulsator allows for easy installation and secure positioning within the milking machine setup. Packed in a sturdy carton box, the Chuangpu Milking Machine Pulsator is convenient to transport and store, making it suitable for various milking environments.

This pulsator is specifically designed for use in milking machines, offering precise control and synchronization of pulsation during the milking process. The Chuangpu HL-P06E CV30 model is a reliable solution for livestock pulsation equipment, ensuring consistent milk flow and optimal milking efficiency.

Whether you are milking cows, goats, or other dairy animals, the Chuangpu Milking Machine Pulsator provides a versatile and dependable pulsation solution. Its electric operation and bracket mount design make it a practical choice for dairy farmers looking to enhance their milking operations.

CV30 Electric Milk Pulsator

Product Name: CV30 Electric Milk Pulsator

Product Model: HL-P06E

Product Feature:

1. Two mouthpieces are tightly connected to the pulsatile tube.
2. Effective regulation of pulsation frequency for gentle milking
3. Spiral base is more convenient to install and fix

PRODUCT PARAMETERS

Model: CV30

Pulsator Rate: 60:40

Material: Plastic Shell

Exit Dia: 10mm

Exits: 2 plastic

Voltage: 24V

Usage: cow/goat milking parts

Package: Cartons
