

High Productivity GEA Milking Machine Electric Pulsator 4 Vacuum Port With Ratio 60/40

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06F GEA
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

Product Specification

- Voltage: 24V
- Weight: 340g
- Power Source: Electric
- Key Selling Points: High Productivity
- Vacuum Ports: 2 Or 4 Ports
- Usage: For Milking Machine
- Dimensions: 82*107*141mm
- Ratio: 60:40
- Highlight: **Electric Milking Machine Pulsator,
4 Vacuum Port Milking Machine Pulsator,
60 / 40 Ratio Milking Machine Pulsator**

Product Description:

The Milking Machine Pulsator is a crucial component in the dairy industry, specifically designed to enhance the efficiency and productivity of milking processes. This innovative Farming Machine Pulsator is an essential piece of Livestock Pulsation Equipment, ideal for dairy farms of all sizes.

Delivered in a sturdy Carton Box packaging, this Milking Machine Pulsator is designed to withstand the rigors of daily use on the farm. With a Voltage rating of 24V, it ensures reliable and consistent performance to meet the demanding needs of modern dairy operations. One of the standout features of this Udder Milking Pulsator is its versatile design, offering the option of 2 or 4 Vacuum Ports to suit different milking setups. This flexibility allows dairy farmers to customize their milking system according to their specific requirements, making it a valuable addition to any dairy operation.

With a Ratio of 60:40, this Milking Machine Pulsator delivers an optimal pulsation pattern that mimics the natural milking process, promoting better udder health and milk flow. The precise ratio ensures gentle yet effective pulsation, leading to improved milk yield and overall udder health.

When it comes to performance, this Milking Machine Pulsator boasts High Productivity as one of its key selling points. By enhancing milking efficiency and ensuring thorough udder stimulation, this pulsator helps streamline the milking process, saving time and labor costs for dairy farmers.

Whether you're a small-scale dairy farmer or managing a large commercial operation, the Milking Machine Pulsator is a reliable and efficient solution to optimize your milking processes. Invest in this top-quality Farming Machine Pulsator today and experience the benefits of enhanced productivity and improved milking efficiency.

Features:

Product Name: Milking Machine Pulsator

Vacuum Ports: 2 Or 4 Ports

Power Source: Electric

Usage: For Milking Machine

Key Selling Points: High Productivity

Packing: Carton Box

Technical Parameters:

Usage	For Milking Machine
Voltage	24V
Dimensions	82*107*141mm
Key Selling Points	High Productivity
Ratio	60:40
Power Source	Electric
Weight	340g
Packing	Carton Box
Vacuum Ports	2 Or 4 Ports
Port Dia.	10mm

Applications:

The Chuangpu HL-P06F GEA Livestock Machine Pulsator is a high-quality product designed for use with milking machines. Weighing only 340g, this pulsator is lightweight and easy to handle, making it a convenient tool for farmers and livestock owners.

Originating from China, this Animal Pulsation Device is known for its durability and efficiency in milking operations. The power source of this pulsator is electric, providing a reliable and consistent performance during milking sessions.

With a port diameter of 10mm, the Chuangpu HL-P06F GEA pulsator is compatible with a wide range of milking machine setups. The ratio of 60:40 ensures optimal pulsation for efficient milking, leading to increased productivity on the farm.

The Product Application Occasions and Scenarios for this Animal Pulsation Device are diverse. It is suitable for dairy farms, livestock

operations, and agricultural settings where milking machines are used. Farmers can rely on this pulsator to maintain a steady and gentle pulsation during the milking process, ensuring the well-being of their animals and the quality of the milk produced. Whether milking cows, goats, or other dairy animals, the Chuangpu HL-P06F GEA Livestock Machine Pulsator is a versatile tool that meets the needs of different livestock owners. Its efficient performance and ease of use make it an essential component of any milking operation.

Electric Milk Pulsator

product name: electric milk pulsator
product Model: HL-P06F
Product Feature:

1. Two models available
2. Effective regulation of pulsation frequency for gentle milking
3. Tightly structured, airtight, strong and durable

PRODUCT PARAMETERS

Model: HL-P06F	Pulsator Rate: 60:40
Material: Plastic Shell	Exit Dia: 10mm
Exits: 2 /4 plastic	Voltage: 24V
Usage: cow/goat milking parts	Package: Cartons
