

## Plastic Electric Milking Machine Vac / Atm Pulsator For Increased Milk Production

Our Product Introduction

more products please visit us on [mobilemilkingmachine.com](http://mobilemilkingmachine.com)

### Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-P06G
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

### Product Specification

- Ratio: 60:40
- Vacuum Ports: 2 Ports
- Frequency: Adjustable
- Voltage: 12V 、 24V
- Key Selling Points: High Productivity
- Weight: 350G
- Name: Vac/Atm Electric Pulsator
- Port Dia.: 10mm
- Highlight: **Plastic Electric Milking Machine Pulsator, Increased Milk Production Milking Machine Pulsator, Vac / Atm Milking Machine Pulsator**

## Product Description

**Corporate HQ:** [CHUANGPU ANIMAL HUSBANDRY TECHNOLOGY\(SUZHOU\) CO.,LTD](#)

**Export Dept:** [ZHANGJIAGANG FANRS MACHINERY CO.,LTD.](#)

**Branch:** [Sichuan Gene Haven Animal Husbandry Technology Co.Ltd](#)

### Product Description:

The Vac/Atm Electric Pulsator is an essential piece of livestock pulsation equipment designed specifically for milking machines. With its adjustable frequency feature, this milking machine pulsator offers flexibility and control to cater to different livestock milking needs.

As a key component in bovine milking operations, the Pulsator ensures efficient and consistent pulsation during the milking process, contributing to the overall productivity and quality of milk production. The 60:40 ratio of this pulsator further enhances its performance, delivering reliable pulsation to facilitate optimum milk extraction.

Packaged in a sturdy carton box, the Vac/Atm Electric Pulsator is not only easy to store but also provides protection during transportation and handling. This packaging ensures that the pulsator reaches you in perfect condition, ready to be integrated seamlessly into your milking machine setup.

Whether you are a small-scale dairy farmer or a large commercial milking operation, this milking machine pulsator is a valuable tool to streamline your milking process, improve efficiency, and maintain milk quality. By investing in the Vac/Atm Electric Pulsator, you are equipping your milking system with a reliable and durable component that is designed to meet the demands of modern dairy farming.

Experience the difference that the Vac/Atm Electric Pulsator can make in your milking operations. Enhance your milking efficiency, ensure consistent pulsation, and optimize your overall milk production with this high-quality and adjustable frequency pulsator. Trust in 's reputation for excellence in dairy equipment to bring you a product that meets the needs of both you and your livestock.

### Features:

Product Name: Milking Machine Pulsator

Application: Dairy Farming

Frequency: Adjustable

Vacuum Ports: 2 Ports

Theory: Electric

Voltage: 12V, 24V

### Technical Parameters:

Application	Dairy Farming
Frequency	Adjustable
Usage	For Milking Machine
Vacuum Ports	2 Ports
Voltage	12V, 24V
Weight	350g
Packing	Carton Box
Theory	Electric
Name	Vac/Atm Electric Pulsator
Ratio	60:40

### Applications:

The Milking Machine Pulsator by Chuangpu, model number HL-P06G, is a top-of-the-line product designed for dairy farming applications. Originating from China, this Vac/Atm Electric Pulsator is a must-have for modern livestock operations.

With its key selling point of high productivity, this electric pulsator operates at a ratio of 60:40, making it efficient and reliable for dairy farmers. Whether you are managing a small-scale dairy farm or a large commercial operation, the Chuangpu Milking Machine Pulsator is suitable for various livestock milking needs.

One of the primary product application occasions for this Farming Machine Pulsator is during the milking process. The pulsator plays a crucial role in regulating the milking cycle, ensuring a smooth and consistent extraction of milk from dairy animals. Its electric theory allows for precise control and synchronization, leading to improved milking efficiency.

Another important scenario where the Milking Machine Pulsator excels is in maintaining the health and well-being of dairy livestock. By providing gentle and consistent pulsation during milking, this pulsator helps reduce stress on animals and minimizes the risk of udder-

related issues.

Whether you are looking to upgrade your current milking equipment or enhance the overall productivity of your dairy farm, the Chuangpu Milking Machine Pulsator is a reliable choice. Its advanced features, high productivity, and electric operation make it a valuable asset for dairy farmers seeking optimal performance in their milking operations.

## Electric Milk Pulsator / Electric Valve

product name: Electric milk pulsator

Electric Valve

product Model: HL-P06G/HL-P06H

Product Feature:

1. Two models available
2. Tightly structured, airtight, strong and durable

### PRODUCT PARAMETERS

Product name	Electric Milk Pulsator	Electric Milk Pulsator
Appearance		
Model	HL-P06G	HL-P06H
Material	塑料	塑料
Exits	Φ10mm	Φ10mm
Pulsator Rate	60:40	60:40
Voltage	12V/24	12V/24
Power consumption (12V)	0.60A/0.30A	0.60A/0.30A
