Cow Farm Equipment Automatic Plastic Watering Bowl for Cattle with float valve to control water level

Our Product Introduction

Basic Information

- Place of Origin: Jiangsu, China
- Brand Name: HL
- Model Number: HL-MP58F
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 7-10 working days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 5000PCS /Month

Product Specification

- Model: HL-58F
- Material: PE
- Weight: 0.9KG
- Volume: 4L
- Animal: Cow, Horse
- Highlight: **cattle drinking bowl**, **cattle water drinking bowl**

Features of Plastic Cow Drinking Bowl
1. Core Features
Lightweight and Economical

The plastic material is lightweight and easy to transport and install, suitable for temporary cow pens or mobile pastures.
Low cost, suitable for farms with limited budgets or small to medium-sized livestock farmers.
Corrosion-resistant and rust-proof

Plastic does not rust and is resistant to acids and alkalis, suitable for environments with long-term contact with water, feed, or disinfectants.
Diverse Designs

It can be paired with a float valve for automatic water replenishment, reducing the frequency of manual water addition.
Some products can be heated (suitable for cold regions) or equipped with anti-bite edges.
Easy to Clean and Maintain

The surface is smooth with no dead corners, easy to rinse, reducing bacterial growth.
2. Applicable Scenarios
Fattening Cow舍: Low cost, suitable for short-term fattening farms.
Pasture or temporary fence: Highly portable and can be moved with the cattle.
Calf feeding: Low design for easy drinking by calves.
3. Precautions
Durability Issues

Long-term exposure to sunlight can easily cause aging and brittleness (choosing UV-resistant plastic can extend its lifespan).
Adult cows may cause damage when chewing, so choose a thicker or anti-chew model.
Stability

The plastic bowl is lightweight and can easily be knocked over by cows. It is recommended to secure it to the ground or use a weighted base.
Winter Frost Protection

Ordinary plastic bowls can easily freeze and crack in severe cold weather; choose materials resistant to low temperatures or use heating devices.

Specification of Water Bowl For Cow, Animal Drinking Bowl:

Model	HL-58F
Body Material	PE
Weight	0.9KG
Volume	4L
Feature	With float valve for water level control
Animal	Cow, Cattle and Horse

Plastic Cow Drinking Bowl Suitable for Short-term Breeding or Budget-limited Pastures, but Needs Attention to Prevent Gnawing and Winter Maintenance
