Product Description:

The Milking Machine Pulsator Mebrane is a vital component for any livestock operation, designed to streamline the milking process and ensure efficiency. This product comes securely packed in a durable Carton Box, providing protection during transportation and storage. Available in either sleek Black or pristine White, the Milking Machine Pulsator Mebrane offers a modern aesthetic that complements any milking setup. Its versatile color options make it a seamless addition to your existing equipment.

Consisting of 3 Pcs Big Membrane and 2 Circle components, this pulsator is engineered for durability and longevity. The high-quality materials used in its construction ensure reliable performance, even in demanding ranching environments. Specifically designed for use with milking machines, this pulsator plays a crucial role in regulating the milking process. By maintaining the appropriate pulsation rhythm, it helps optimize milk flow and ensure thorough milking, enhancing overall productivity.

The Milking Machine Pulsator Mebrane is compatible with the LE30 Electric Milk Pulsator, a popular choice among livestock owners for its precision and efficiency. When used in conjunction with this advanced pulsator model, the Milking Machine Pulsator delivers exceptional results, making it an essential tool for any ranching operation.

Whether you are managing a dairy farm, livestock ranch, or any other agricultural enterprise, the Milking Machine Pulsator Mebrane is a must-have accessory for your milking equipment. Its reliable performance and user-friendly design make it suitable for a wide range of livestock operations.

Invest in the Milking Machine Pulsator Mebrane today and experience the difference it can make in your milking process. Enhance efficiency, improve milk quality, and streamline your operations with this essential ranching machine pulsator.

Features:

Product Name: Milking Machine Pulsator Mebrane

Application: LE30 Electric Milk Pulsator

Packing: Carton Box

Usage: For Milking Machine Pulsator

Consists of: 3 Pcs Big Membrane And 2 Circle

Color: Black Or White

Technical Parameters:

Usage	For Milking Machine Pulsator
Application	LE30 Electric Milk Pulsator
Consists of	3 Pcs Big Membrane And 2 Circle
Material	Silicone
Packing	Carton Box
Color	Black Or White

Applications:

The Chuangpu HL-P07B Udder Milking Pulsator Mebrane is a high-quality animal pulsation device designed for use in livestock machine pulsators. Made in China, this pulsator consists of 3 pieces of big membrane and 2 circles, all made of silicone material. The color options available are black or white, and the product is packed in a sturdy carton box for safe transportation.

With its reliable performance and durable construction, the Chuangpu Udder Milking Pulsator Mebrane is suitable for a variety of product application occasions and scenarios. Farmers and dairy producers can use this pulsator in dairy farms for efficient and hygienic milking processes. The pulsator helps in stimulating the udder and maintaining a consistent pulsation rate, ensuring thorough and comfortable milking for the animals.

Whether it is a small-scale dairy operation or a large commercial farm, this pulsator is a valuable tool for improving milking efficiency and productivity. It can be easily integrated into existing milking machines or systems, offering a seamless milking experience for both the operators and the animals.

Furthermore, the Chuangpu HL-P07B Udder Milking Pulsator Mebrane is versatile enough to be used in different livestock species, including cows, goats, and sheep. Its precise pulsation mechanism helps in preventing over-milking and optimizing milk yield, making it an essential component in modern dairy farming practices.

In conclusion, the Chuangpu Udder Milking Pulsator Mebrane is a reliable and efficient solution for dairy farmers looking to enhance their milking processes. Its thoughtful design, quality materials, and excellent performance make it a valuable asset in any livestock machine pulsation setup.
