Product Description:

The IP10 Milking Inflation is a top-of-the-line product in the realm of milking machine liners. Manufactured by Milk-rite, a renowned name in the industry, this particular liner is designed to enhance the milking process and ensure optimal performance. Made from high-quality rubber material, the IP10 Milking Inflation is durable, reliable, and built to last.

The classic black color of the IP10 Milking Inflation not only adds a touch of elegance but also ensures visibility and easy maintenance. Cleaning this milking machine liner is a breeze, as it can be easily cleaned with warm water and soap, making it a convenient choice for busy dairy farmers and operators.

One of the key features of the IP10 Milking Inflation is its compatibility with milk extraction tubes, making it an essential component for efficient milk extraction. Whether used in a small-scale dairy farm or a large commercial operation, this milking machine liner is a versatile and indispensable tool for dairy farmers.

When it comes to cow milking accessories, the IP10 Milking Inflation stands out for its superior performance and reliability. Its sturdy rubber construction ensures a secure fit and optimal functionality, while its black color adds a touch of sophistication to the milking setup. For cattle teat cylinders, the IP10 Milking Inflation is a preferred choice due to its durable material and easy cleaning method. Designed to withstand the rigors of daily milking routines, this liner is a dependable asset for dairy farmers looking to streamline their operations and maximize productivity.

Features:

Product Name: Milking Machine Liners

Difference: With Vent Or Without Vent For Choosing

Color: Black

Quantity: Sold In Sets Of 4 Liners

Name: IP10 Milking Inflation

Shape: Cylindrical

Technical Parameters:

Shape	Cylindrical
Teat Cup Size	148.8mm/40mm/24mm
Cleaning Method	Easily Cleaned With Warm Water And Soap
Material	Rubber
Usage	For Milking Cows And Other Dairy Animals
Durability	Long-lasting
Name	IP10 Milking Inflation
Color	Black
Animal	Cow
Service Life	2500 Milking Times

Applications:

The Chuangpu IP10 Milking Inflation liners are essential components in a dairy milking system, designed for use with vacuum teat cups to ensure efficient and comfortable milking of cows and other dairy animals. These flexible rubber liners, originating from China, are sold in sets of 4, providing a convenient solution for dairy farmers.

The IP10 Milking Inflation liners are specifically crafted to work seamlessly with vacuum teat cups, ensuring a secure and effective milking process. These liners play a crucial role in the dairy milking system, working in conjunction with other components such as the Cattle Teat Cylinder to facilitate optimal milk extraction.

With their flexible design, the Chuangpu IP10 Milking Inflation liners offer reliable performance and durability, making them a practical choice for dairy farmers seeking high-quality milking equipment. The rubber material used in the construction of these liners ensures both

strength and flexibility, essential qualities for consistent milking operations.

Whether you are milking cows or other dairy animals, the IP10 Milking Inflation liners provide a reliable and efficient solution for your milking needs. These liners are easy to install and maintain, offering convenience and peace of mind to dairy farmers looking to optimize their milking processes.

In conclusion, the Chuangpu IP10 Milking Inflation liners are a must-have product for dairy farmers utilizing vacuum teat cups in their milking operations. With their flexibility, durability, and practical design, these liners are a valuable addition to any dairy milking system, enhancing efficiency and productivity.
