Product Description:

The IP15 Milking Inflation is a top-quality livestock milking supply designed to enhance the milking process for cows and other dairy animals. With its cylindrical shape, this milking machine liner is specially crafted to fit perfectly with cattle teat cylinders, providing a secure and efficient milking experience.

One of the key features of the IP15 Milking Inflation is its exceptional resistance to wear and tear. Made from high-quality materials, this milking machine liner is highly durable and can withstand the rigors of regular use in a dairy farming environment. This makes it a reliable and long-lasting solution for dairy farmers looking to optimize their milking operations.

Whether you are milking cows, goats, or other dairy animals, the IP15 Milking Inflation is a versatile and practical choice. Its compatibility with vacuum teat cups ensures a tight seal during the milking process, preventing any leaks and ensuring efficient milk extraction.

One of the standout features of the IP15 Milking Inflation is the option to choose between a vented and non-vented design. This customization allows dairy farmers to select the most suitable option based on their specific milking setup and preferences. The vented design helps to regulate air pressure and flow, while the non-vented option provides a more straightforward milking experience.

Overall, the IP15 Milking Inflation is a reliable and efficient solution for dairy farmers looking to improve their milking process. With its cylindrical shape, high resistance to wear and tear, and versatility in usage, this milking machine liner is an essential tool for any livestock milking operation.

Features:

Product Name: Milking Machine Liners

Difference: With Vent Or Without Vent For Choosing

Type: Milk-rite

Animal: Cow

Quantity: Sold In Sets Of 4 Liners

Name: IP15 Milking Inflation

Technical Parameters:

Quantity	Sold In Sets Of 4 Liners
Teat Cup Size	148.8mm/40mm/24mm
Difference	With Vent Or Without Vent For Choosing
Animal	Cow
Service Life	2500 Milking Times

Applications:

The Milking Machine Liners by Chuangpu (Model IP15) are essential livestock milking supplies designed for use in livestock milking mechanisms, specifically for cows. These high-quality liners, made of durable rubber material, originate from China and are part of the Milk-rite product line.

The versatility of the Chuangpu Milking Machine Liners makes them suitable for various livestock milking application occasions and

scenarios. Farmers and dairy producers can use these liners during daily milking routines on dairy farms, milk processing plants, or livestock breeding facilities.

Thanks to their long-lasting durability, these Milking Machine Liners provide a reliable and efficient milking experience, ensuring consistent performance over an extended period. The easy cleaning method of these liners, requiring only warm water and soap, enhances their usability and maintenance convenience.

Whether used in traditional milking parlors or automated milking systems, the Chuangpu Milking Machine Liners offer a seamless milking process, optimizing milk extraction while maintaining the health and comfort of the cows. Their precise design and compatibility with various milking machines make them a valuable addition to any livestock milking setup.
