### Product Description:

The Milking Machine Liners are essential cow milking accessories designed for the livestock milking mechanism. These high-quality liners are a crucial component in the milking process, ensuring efficient and hygienic milk extraction from cows.

Cleaning these liners is a breeze as they can be easily cleaned with warm water and soap, maintaining optimal cleanliness and functionality. The cleaning method ensures that the liners remain free from any contaminants, guaranteeing the quality of the milk extracted.

One of the standout features of these Milking Machine Liners is the option to choose between a vented or non-vented design. This difference allows users to select the appropriate liner based on their specific milking requirements, providing flexibility and customization in the milking process.

These liners are of the Milk-rite brand, known for its superior quality and reliability in cow milking accessories. The cylindrical shape of the liners is designed to fit seamlessly into milking machines, ensuring a secure and efficient milking process.

The Milking Machine Liners are sold in sets of 4, offering convenience and value for users who require multiple liners for their milking operations. The quantity provided allows for easy replacement and rotation of liners, ensuring continuous and uninterrupted milking procedures.

### Features:

Product Name: Milking Machine Liners

Animal: Cow

Service Life: 2500 Milking Times

Cleaning Method: Easily Cleaned With Warm Water And Soap

Flexibility: Flexible

Teat Cup Size: 143mm/45mm/23mm

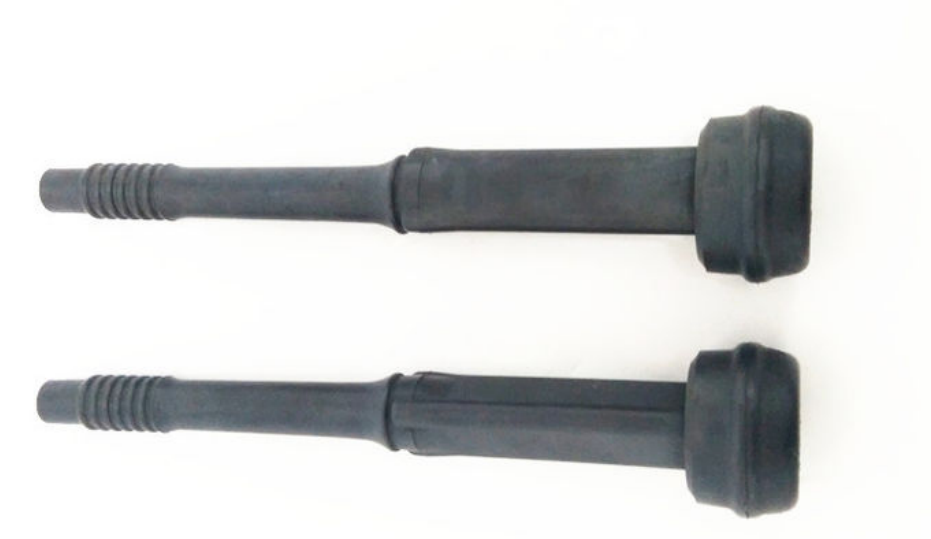

### Technical Parameters:

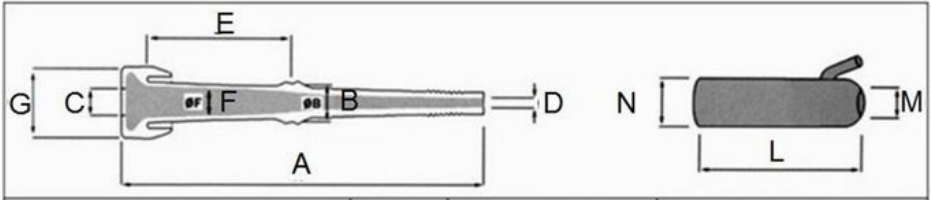

Quantity	Sold In Sets Of 4 Liners
Color	Black
Resistance	Highly Resistant To Wear And Tear
Flexibility	Flexible
Material	Rubber
Shape	Cylindrical
Teat Cup Size	143mm/45mm/23mm
Service Life	2500 Milking Times
Usage	For Milking Cows And Other Dairy Animals
Name	IP25 Milking Inflation

### Applications:

Chuangpu's IP25 Milking Machine Liners are essential livestock milking supplies designed for dairy farming equipment. Made from high-quality rubber material, these Milk-rite liners are known for their durability and reliability. Originating from China, the IP25 model is a top choice for farmers looking for efficient and effective cattle teat cylinder solutions. The IP25 Milking Inflation liners are specifically designed to cater to the needs of dairy farmers. One notable feature of these liners is the option to choose between a vented or non-vented design, providing flexibility based on specific milking requirements. Each set of IP25 Milking Inflation liners includes 4 liners, ensuring that farmers have an adequate supply for their milking operations. These Milking Machine Liners are suitable for a variety of application occasions and scenarios on dairy farms. Whether milking cows, goats, or sheep, the Chuangpu IP25 model delivers consistent performance and optimal milk extraction. The Milk-rite design ensures a secure fit and proper suction, contributing to efficient milking processes and improved milk quality. Farmers can rely on the IP25 Milking Machine Liners to streamline their milking routines and enhance overall productivity on the

farm. The durable rubber material ensures longevity and resistance to wear and tear, making them a cost-effective investment for dairy operations. With the option to choose between vented and non-vented liners, farmers can customize their milking setup to meet their specific needs and preferences. In conclusion, the Chuangpu IP25 Milking Machine Liners are a versatile and practical choice for dairy farmers seeking reliable and efficient cattle teat cylinder solutions. With their high-quality construction, customizable vent options, and convenience of being sold in sets of 4, these liners are a valuable addition to any livestock milking operation.
