Product Description:

The Milking Machine Liners are essential cow milking accessories designed for efficiently milking cows and other dairy animals. With a reference code of 7021-2725-230, this pack includes 4 high-quality liners suitable for use in a livestock milking mechanism. Constructed from durable rubber or silicone material, these milk extraction tubes are built to withstand the rigorous demands of daily milking operations. The black and white color options provide flexibility to suit different milking setups and preferences.

Whether you are a small-scale dairy farmer or a large commercial dairy operation, these Milking Machine Liners are a valuable addition to your milking equipment. The precise design and reliable performance of these liners ensure efficient milk extraction while prioritizing the comfort and well-being of the animals.

Each liner in the pack of 4 is carefully crafted to maintain optimal suction and pressure during the milking process, resulting in consistent milk flow and minimal discomfort for the animals. The high-quality materials used in the construction of these liners contribute to their longevity and resistance to wear and tear.

By incorporating these Milking Machine Liners into your milking routine, you can streamline the milking process and enhance the overall productivity of your dairy operation. The ease of use and compatibility of these liners with standard milking machines make them a practical choice for dairy farmers looking to maximize efficiency.

Investing in reliable milking equipment such as these liners is crucial for maintaining the health and productivity of your dairy animals. The seamless integration of these liners into your livestock milking mechanism ensures smooth operation and consistent results with each milking session.

Ensure your milking process is optimized for efficiency and animal welfare with the Milking Machine Liners pack. With their superior performance, durable construction, and versatile design, these liners are a must-have for any dairy farmer seeking to enhance their milking operations.

Features:

Product Name: Milking Machine Liners

Usage: For Milking Cows And Other Dairy Animals

Name: 230 Milking Liner

Quantity: Pack Of 4

Resistance: Chemical And Heat Resistant

Color: Black / White

Technical Parameters:

Durability	Long-lasting
Teat Cup Size	147mm/44mm/27mm
Usage	For Milking Cows And Other Dairy Animals
Reference Code	7021-2725-230
Compatibility	Fits Most Standard Milking Machines
Material	Rubber / Silicone
Name	230 Milking Liner
Resistance	Chemical And Heat Resistant
Type	Westfalia
Quantity	Pack Of 4

Applications:

The Chuangpu WS230U Milking Machine Liners are essential livestock milking supplies designed to enhance the efficiency and productivity of your livestock milking mechanism. Manufactured in China, these liners are specifically crafted for use in cattle teat cylinders and are compatible with the Westfalia milking machine system.

With teat cup size dimensions of 147mm/44mm/27mm, these liners are suitable for a variety of cattle breeds, providing a secure and comfortable fit during the milking process. Made from high-quality rubber and silicone materials, the Chuangpu milking machine liners are built to last, ensuring long-lasting durability even under continuous use.

The primary function of these liners is to create a vacuum seal that is crucial for efficient milking operations. By maintaining a consistent and reliable seal, the liners help optimize milk extraction, resulting in higher productivity and reduced milking time.

Whether you are a small-scale dairy farmer or a large commercial operation, the Chuangpu WS230U Milking Machine Liners are ideal for various milking occasions and scenarios. From daily milking routines to specialized milking processes, these liners offer a reliable solution for achieving consistent results and maximizing milk yield.
