

Improve Milking Process Boumatic 420CC Milking Machine Collector

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M03C-5 Bomatic
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000PCS /Month

Product Specification

- Air Outlet Dia.: 9.8mm
- Range: Cow Milking Machine Replacement Parts
- Item: Cow Milking Machine Claw
- Milk Outlet Diameter: 21.3mm
- Weight: 0.46kg
- Model: HL-M03C-2 Bomatic
- Claw Base: PSU
- Claw Type: Four-Prong
- Highlight: Collector milking machine parts, 420CC Milking Machine Collector, Boumatic Milking Machine Collector

Product Description:

The Milking Machine Claw is an essential component in the dairy industry, specifically designed for cow milking machines. This udder suction claw is meticulously crafted to meet the highest standards of quality and efficiency, ensuring optimal performance during the milking process.

Key attributes of the Milking Machine Claw include a Liner Outlet Diameter of 15.7mm and a Milk Outlet Diameter of 21.3mm. These specifications are carefully engineered to facilitate smooth milk flow and minimize any potential disruptions during milking.

As part of the Cow Milking Machine Replacement Parts range, this milking machine claw is a dependable choice for dairy farmers looking to maintain and upgrade their milking equipment. The durable construction and precise measurements make it a reliable component for daily milking operations.

The Milking Machine Claw is constructed with a Cap Material of PSU, known for its excellent strength and resistance to heat and chemicals. This ensures that the claw can withstand the rigors of frequent use and cleaning, prolonging its lifespan and efficiency. Unlike some milking machine claws that come with a Shut-off Valve, this particular model is designed Without Valve. While shut-off valves can be beneficial in certain setups, the absence of a valve in this claw streamlines the milking process, allowing for continuous milk flow without interruptions.

Whether you are a small-scale dairy farmer or manage a larger milking operation, the Milking Machine Claw offers reliability, durability, and efficiency in one compact component. Its precise Liner Outlet and Milk Outlet Diameters ensure proper milk extraction, while the quality PSU material and valve-free design contribute to seamless milking sessions.

Investing in the Milking Machine Claw means investing in the future of your dairy operation. Experience the difference that quality replacement parts can make in your milking routine, and trust in the performance and durability of this udder suction claw for your cows' comfort and milk production.

Features:

Product Name: Milking Machine Claw

Cap Material: PSU

Claw Type: Four-Prong

Capacity: 420CC

Liner Outlet Diameter: 15.7mm

Range: Cow Milking Machine Replacement Parts

Technical Parameters:

Difference	Independent Air Connector
Claw Base	PSU
Claw Type	Four-Prong
Liner Outlet Diameter	15.7mm
Capacity	420CC
Weight	0.46kg
Item	Cow Milking Machine Claw
Shut-off Valve	Without Valve
Range	Cow Milking Machine Replacement Parts
Cap Material	PSU

Applications:

The Chuangpu HL-M03C-5 Bomatic milking machine claw is a high-quality dairy cow milking claw designed for efficient and hygienic milk collection. With its four-prong claw type and a milk outlet diameter of 21.3mm, this milking machine claw is perfect for use in dairy farms and milk processing facilities.

Manufactured in China, the Chuangpu milking machine claw is known for its reliability and durability. The claw base is made of sturdy PSU material, ensuring long-lasting performance even in demanding milking conditions. The dairy machine claw is lightweight, weighing only 0.46kg, making it easy to handle and attach to milking equipment. Its compact design and efficient milk flow make it suitable for use in various dairy cow milking systems. Whether you have a small-scale dairy farm or a large commercial operation, the Chuangpu milking machine claw is a versatile and essential tool for your milking process. It is ideal for both manual and automated milking systems, providing consistent milk extraction and reducing milking time. With its four-prong claw design and reliable construction, the Chuangpu HL-M03C-5 Bomatic milking machine claw is a must-have for dairy farmers looking to streamline their milking process and ensure the highest quality milk output.

420CC Milk Claw

Model: HL-M03C-5

Capacity: 420CC

Material: PSU

Applicable: COW

Milk Outlet Dia: 21.3mm

Liner Outlet Dia: 15.7mm

Air Outlet Dia: 9.1mm

Weight: 0.46kg

Packing: carton
