

Smooth Milking Process Orion Milking Machine Claw 450CC with Shut off Valve

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-M05
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000PCS /Month

Product Specification

- Item: Cow Milking Machine Claw
- Reference Brand: Orion
- Model: HL-M05
- Range: Cow Milking Machine Replacement Parts
- Air Outlet Dia.: 9.5mm
- Milk Outlet Diameter: 19.4mm
- Cap Material: PPSU
- Capacity: 450CC
- Highlight: **450CC Milking Machine Claw, Shut-off Valve Milking Machine Claw, Orion Milking Machine Claw**

Product Description:

One standout attribute of this milking claw is its shut-off valve, which allows for precise control over the milk flow. This feature is crucial for ensuring that the milking process is carried out smoothly and efficiently, while also minimizing waste. With the shut-off valve, dairy farmers can easily regulate the milk flow, making the entire process more manageable.

Constructed from high-quality PPSU, the cap material of the milking claw is both durable and hygienic. PPSU is known for its resistance to high temperatures and chemicals, making it an ideal material for dairy machine claws. This ensures that the milking claw remains in optimal condition for long-term use, providing reliable performance during each milking session.

The milk outlet diameter of the milking claw is 19.4mm, allowing for a smooth and efficient flow of milk from the cow to the milking cluster.

This optimal diameter helps to prevent clogs and blockages, ensuring that the milk is extracted quickly and effectively. With this feature, dairy farmers can expect consistent and reliable performance from their milking machine claw.

Another key feature of this milking claw is its stainless steel claw base. Stainless steel is a durable and easy-to-clean material, making it ideal for use in dairy operations. The claw base provides a sturdy foundation for the milking cluster, ensuring stability and reliability during the milking process. With this stainless steel base, dairy farmers can trust that their milking claw will withstand the rigors of daily use.

In summary, the Milking Machine Claw with shut-off valve, model HL-M05, is a high-quality and reliable product designed to enhance the milking process for dairy farmers. With its durable PPSU cap material, optimal milk outlet diameter, and stainless steel claw base, this milking claw offers superior performance and longevity. Whether used in a small-scale dairy operation or a large commercial dairy farm, this milking claw for cows is a valuable tool that ensures efficient milk extraction and consistent results.

Features:

Product Name: Milking Machine Claw
Item: Cow Milking Machine Claw
Reference Brand: Orion
Range: Cow Milking Machine Replacement Parts
Weight: 0.53kg
Claw Type: Four-Prong

Technical Parameters:

Shut-off Valve	With Valve
Range	Cow Milking Machine Replacement Parts
Cap Material	PPSU
Capacity	450CC
Liner Outlet Diameter	13.5mm
Model	HL-M05
Milk Outlet Diameter	19.4mm
Item	Cow Milking Machine Claw
Reference Brand	Orion
Air Outlet Dia.	9.5mm

Applications:

The Chuangpu HL-M05 Cow Milking Machine Claw is a high-quality dairy cow milking claw designed for efficient milk harvesting. With a weight of 0.53kg, this milking machine claw is lightweight and easy to handle during milking operations. The air outlet diameter of 9.5mm ensures smooth air flow, contributing to the overall effectiveness of the milking process.

Originating from China, the Chuangpu HL-M05 milking machine claw is a reliable and durable product suitable for various milking application occasions. Whether used in small-scale dairy farms or large commercial operations, this milking claw delivers consistent performance and ensures thorough milk extraction.

The inclusion of a shut-off valve in the design of the HL-M05 milking machine claw provides added convenience and control during milking sessions. This feature allows operators to easily stop the milk flow when needed, reducing spillage and optimizing the milking process.

Farmers and dairy industry professionals can trust the Chuangpu HL-M05 milking machine claw to meet their milk harvesting needs with precision and efficiency. Its robust construction and thoughtful design make it a valuable tool for maintaining the health and productivity of dairy cows.

Whether it's daily milking routines, special milking occasions, or milking demonstrations, the HL-M05 milking machine claw is a versatile product that excels in various milking scenarios. Its superior performance and ease of use make it an essential component of any dairy operation seeking reliable milking equipment.
