

HL-V250D Milking Machine Dry Type Pump With 1.1Kw Motor And 250L Volume

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-V250D
- Minimum Order Quantity: One Set
- Price: Negotiable
- Packaging Details: Wooden Case
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 500SETS/Month

Product Specification

- Volume: 250L
- Noise: ≤50Db(A)
- Ultimate Pressure: ≤90Mpa
- Name: 250L Dry Type Vacuum Pump
- Weight: 30kg
- Delivery Port: Shanghai Port
- Type: Integrated Pump
- Speed: 1440r/min
- Highlight: 1.1Kw Milking Machine Dry Pump,
250L Milking Machine Dry Pump,
Dry Type Milking Machine Pump

Product Description:

The Milking Vacuum Pump is a versatile and powerful liquid vacuum suction pump designed for milking operations in dairy farms. With a large volume capacity of 250L, this pump is ideal for efficiently extracting milk from dairy cows during milking sessions.

Equipped with a robust motor boasting a power range of 0.75Kw to 1.1Kw, this oil vacuum pump provides the necessary suction force to effectively draw milk from the cows' udders. The variable power options allow for flexibility in usage based on the specific milking requirements.

Weighing approximately 30kg, the Milking Vacuum Pump is a portable and easy-to-transport solution for dairy farmers. Despite its lightweight design, this rotary vacuum pump delivers consistent performance and reliable operation, making it a valuable asset in any milking setup.

One of the key features of this vacuum pump is its impressive vacuum degree of 50Kpa. This high level of vacuum ensures thorough and efficient milk extraction, helping dairy farmers streamline their milking process and maximize productivity.

With a speed of 1440r/min, the Milking Vacuum Pump operates at an optimal pace to maintain a steady flow of milk during the milking process. The consistent speed helps prevent any disruptions or fluctuations in milk extraction, ensuring a smooth and uninterrupted milking operation.

Whether you are a small-scale dairy farmer or a large commercial dairy operation, the Milking Vacuum Pump offers the performance, reliability, and efficiency needed to support your milking activities. Its versatility, power, and precision make it an essential tool for any dairy farm looking to enhance their milk extraction process.

Features:

Product Name: Milking Vacuum Pump

Motor Power: 0.75Kw / 1.1Kw

Ultimate Pressure: ≤90Mpa

Name: 250L Dry Type Vacuum Pump

Material: Iron

Speed: 1440r/min

Technical Parameters:

Weight	30kg
Model	HL-V250D
Speed	1440r/min
Volume	250L
Application	Cow And Goat Milking Machine
Noise	≤50Db(A)
Material	Iron
Vacuum Degree	50Kpa
Delivery Port	Shanghai Port
Type	Integrated Pump

Applications:

The Chuangpu HL-V250D 250L Dry Type Vacuum Pump is a versatile and essential piece of equipment designed for dairy milking operations. With its powerful motor power options of 0.75Kw and 1.1Kw, this integrated pump is capable of efficiently creating the necessary vacuum pressure for milking processes.

One of the key application occasions for the HL-V250D vacuum pump is in dairy farms and milking facilities. It is specifically designed to cater to the needs of dairy farmers, providing a reliable and consistent vacuum source for milking machines. The pump can be used for both small-scale and large-scale dairy operations, ensuring smooth and hygienic milking processes.

Another important scenario where the HL-V250D vacuum pump excels is in vacuum cleaning applications. Its powerful suction capabilities make it ideal for cleaning dairy equipment, barns, and milking parlors. The pump can effectively remove dirt, debris, and liquids, helping to maintain a clean and sanitary environment in dairy facilities.

Manufactured in China, the Chuangpu HL-V250D vacuum pump is known for its durability and reliability. Weighing 30kg, it is a sturdy and robust equipment that can withstand the demands of daily milking operations. Its integrated design simplifies installation and maintenance, making it a convenient and efficient choice for dairy farmers.

Overall, the HL-V250D 250L Dry Type Vacuum Pump by Chuangpu is a dependable and high-performance solution for dairy vacuum milking pump requirements. Whether used for milking processes or vacuum cleaning tasks, this pump delivers consistent and powerful performance, making it an essential tool for dairy farmers and milking facilities.

Product parameters

Model	HL-V250	HL-V300	HL-V550	HL-V850	HL-V1500	HL-V2100	HL-VD250
