

Milking Machine Parts Vacuum Regulator with 30-60Kpa Measuring Range

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP43A
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Payment Terms: T/T, Western Union,
- Supply Ability: 50000PCS /Month

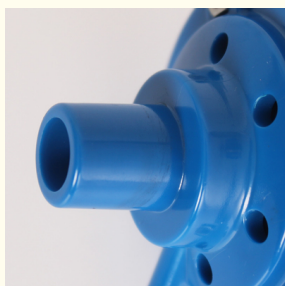

Product Specification

- For: Portable Milking Machine
- Name: Vacuum Regulator
- Material: Plastic
- Weight: 0.1Kg
- Function: Adjust Vacuum Pressure
- Installing: Insert Into The Air Tank
- Condition: New
- Use: Milking Machine Accessories
- Highlight: **Milking Machine Parts Vacuum Regulator, 30Kpa Vacuum Regulator Milking Machine, 60Kpa Vacuum Regulator Milking Machine**

Product Description:

The Milking Machine Parts product, specifically the Vacuum Regulator, is an essential component for maintaining optimal performance in milking machines. This high-quality spare part is designed to regulate the vacuum pressure within the system, ensuring efficient and consistent milking operations.

As part of the range of cow milking attachments, this Vacuum Regulator is compatible with a wide variety of milking equipment products. It is suitable for use in systems with a matching capacity of 50 to 3000 Liters per minute, making it versatile for different herd sizes and milking setups.

The Vacuum Regulator features a precise measuring range of 30 to 60Kpa, allowing dairy farmers to adjust the vacuum pressure according to the specific requirements of their milking process. This level of control is crucial for maximizing milk yield while ensuring the comfort and well-being of the animals being milked.

This product is brand new, guaranteeing reliability and performance consistency. Whether you are looking to upgrade your existing milking machine or replace a worn-out vacuum regulator, this spare part is a cost-effective solution that promises durability and longevity. One of the key functions of the Vacuum Regulator is to adjust the vacuum pressure within the milking system. By precisely controlling the vacuum levels, dairy farmers can optimize the milking process for efficiency and quality. This critical function ensures that the milking machine operates at its peak performance, resulting in improved productivity and milk quality.

Investing in high-quality milking machine spare parts such as the Vacuum Regulator is essential for maintaining the overall efficiency and effectiveness of your milking equipment. By ensuring that all components are in top working condition, you can minimize downtime, reduce maintenance costs, and enhance the productivity of your dairy operation.

Features:

Product Name: Milking Machine Parts

Name: Vacuum Regulator

For: Portable Milking Machine

Use: Milking Machine Accessories

Installing: Insert Into The Air Tank

Weight: 0.1Kg

Technical Parameters:

Weight	0.1Kg
Installing	Insert Into The Air Tank
Material	Plastic
Condition	New
For	Portable Milking Machine
Use	Milking Machine Accessories
Matching Capacity	50 - 3000 Liters/minute
Name	Vacuum Regulator
Measuring Range	30-60Kpa
Function	Adjust Vacuum Pressure

Applications:

The Milking Machine Parts offered by Chuangpu, specifically the Vacuum Regulator model HL-MP43A, originates from China and is brand new. These milking machine spare parts are essential accessories for milking machines, especially for maintaining optimal performance.

The Vacuum Regulator is made of high-quality plastic, ensuring durability and reliability during milking processes. It features a measuring range of 30-60Kpa, making it suitable for various milking scenarios.

Product Application Occasions and Scenarios for the Milking Machine Parts include:

1. Dairy Farms: The Vacuum Regulator is ideal for use in dairy farms of all sizes, providing precise control over vacuum levels for efficient

milking operations.

2. **Livestock Operations:** Whether in small-scale or large-scale livestock operations, the Vacuum Regulator plays a crucial role in maintaining consistent vacuum pressure for milking pulsator membranes.

3. **Veterinary Clinics:** Veterinary clinics that offer milking services can benefit from using the Vacuum Regulator to ensure the proper functioning of milking machines and enhance the milking process.

4. **Agricultural Institutions:** Agricultural institutions that focus on dairy production can rely on the Vacuum Regulator to support their milking equipment and optimize milk extraction processes.

Overall, the Vacuum Regulator by Chuangpu is a versatile and essential component for milking machine systems, offering reliability, durability, and precise vacuum control. Its compatibility with milking pulsator membranes makes it a valuable addition to any milking operation, ensuring smooth and efficient milk extraction processes.

Style 1: HL-MP43A

Product material: Plastic

Voltage regulation range: 30-60Kpa

Supporting ability: 50-3000 L/min

Diameter: 16.5mm

Weight: 0.09KG

Usage: Used to adjust the vacuum range of small milking machines

Style 2: HL-MP43A

Product material: Plastic

Voltage regulation range: 30-60Kpa

Supporting ability: 50-3000 L/min

Diameter: 19mm

Weight: 0.6KG

Usage: Used to adjust the vacuum range of large milking machines
