

300ml Bottle Volume Plastic Oil Pot For Milking Machine Working With Vacuum Pump Oil

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-V02
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Carton
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000PCS /Month

Product Specification

- Installing: Insert Into The Vacuum Pump
- Bottle Height: 120mm
- Bottle Diameter: 80mm
- For: Vacuum Pump
- Usage: Fill With Vacuum Pump Oil
- Condition: New
- Bottle Volume: 300ml
- Use: Milking Machine Accessories
- Highlight: **Milking Machine Oil Pot, 300ml Plastic Oil Pot, Vacuum Pump Oil Pot**

Product Description:

The Milking Machine Parts product includes the Vacuum Pump Oil Pot, an essential component made of durable plastic material. This product is designed to be filled with vacuum pump oil and has a bottle height of 120mm, making it suitable for various milking machine models.

As a crucial part of the milking system components, the Vacuum Pump Oil Pot plays a significant role in maintaining the efficiency and performance of the milking machine. By ensuring that the vacuum pump is properly lubricated with oil, this component helps in the smooth operation of the dairy machine, resulting in optimal milk extraction during the milking process.

When it comes to installing the Vacuum Pump Oil Pot, users can easily insert it into the vacuum pump of the milking machine. This straightforward installation process allows for quick and hassle-free maintenance, ensuring that the milking system continues to function effectively.

The Vacuum Pump Oil Pot is equipped with a pulsator diaphragm, a critical component that helps regulate the pulsation rate in the milking machine. This diaphragm is essential for controlling the vacuum pressure and ensuring proper milk flow during the milking process. By incorporating this key feature, the Vacuum Pump Oil Pot contributes to the overall efficiency and reliability of the dairy machine. Whether you are a dairy farmer or a professional involved in milk production, having high-quality milking machine parts such as the Vacuum Pump Oil Pot is essential for maintaining the performance of your milking system. With its durable plastic construction, convenient usage, and compatibility with vacuum pump oil, this product is a reliable choice for ensuring the smooth operation of your dairy equipment.

Features:

Product Name: Milking Machine Parts

Usage: Fill With Vacuum Pump Oil

Condition: New

Installing: Insert Into The Vacuum Pump

Material: Plastic

Use: Milking Machine Accessories

Technical Parameters:

Name	Vacuum Pump Oil Pot
Installing	Insert Into The Vacuum Pump
Bottle Diameter	80mm
Condition	New
Usage	Fill With Vacuum Pump Oil
For	Vacuum Pump
Use	Milking Machine Accessories
Bottle Volume	300ml
Material	Plastic
Bottle Height	120mm

Applications:

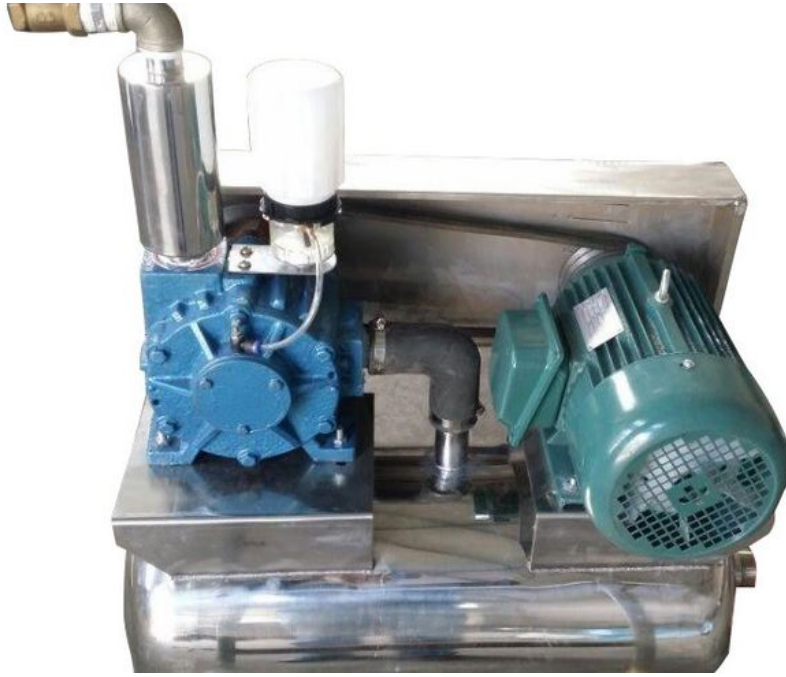

The Chuangpu HL-V02 Vacuum Pump Oil Pot is an essential component for milking machines, specifically designed for milking system components. With a bottle height of 120mm and a volume capacity of 300ml, this high-quality product is manufactured in China, ensuring durability and reliability.

One of the key application occasions for the Vacuum Pump Oil Pot is during the maintenance and servicing of milking machines. It is used for filling the vacuum pump with oil, which is crucial for the smooth operation of the milking system components. By inserting the oil pot into the vacuum pump, users can easily refill the oil reservoir, ensuring optimal performance of the milking machine.

In addition to regular maintenance tasks, the Vacuum Pump Oil Pot is also suitable for milk pulsator repair kits. When servicing milking system components such as the milk pulsator, having a reliable supply of vacuum pump oil is essential to ensure proper functionality and

efficiency.

Whether you are a dairy farmer, veterinarian, or agricultural professional, the Chuangpu HL-V02 Vacuum Pump Oil Pot offers a convenient and practical solution for maintaining milking system components. Its user-friendly design and compatibility with various milking machines make it a versatile product for a wide range of milking applications.
