Product Description:

The Milking Machine Bucket is an essential component of any livestock milking device, serving as the container for collecting milk during the milking process. This product boasts a bottom diameter of 305mm, providing ample space to hold milk efficiently. The package includes 1 Milking Machine Bucket, ensuring that you have everything you need for your milking operations.

Designed for manual cleaning, this Milking Machine Bucket offers convenience and ease of maintenance. With its durable construction, it is built to withstand the rigors of daily use on the farm. The bucket is also easy to clean, saving you time and effort in maintaining hygiene standards during milking.

One of the standout features of this Milking Machine Bucket is its rust-resistant properties, ensuring longevity and reliability even in demanding farm environments. The bucket's resistance to rust helps maintain the quality of the milk collected and enhances the overall durability of the product.

With a volume capacity of 30 liters or 30 kilograms, this Milking Machine Bucket provides ample storage space for milk, allowing for efficient milk collection without the need for frequent emptying. Whether you are using an automatic milk extractor or manually milking your livestock, this bucket is designed to meet your needs effectively.

Whether you are a small-scale farmer or a commercial dairy operation, the Milking Machine Bucket is a versatile and reliable tool for milk collection. Its robust construction, easy cleaning process, and rust-resistant properties make it an ideal choice for any farm setting. Invest in the Milking Machine Bucket today and experience the convenience and efficiency it brings to your milking operations. Say goodbye to inadequate milk pails and upgrade to a high-quality, durable solution that is designed to meet the demands of modern livestock milking devices.

Features:

Milking Bucket

Cow Milk Collector

Durable

Easy To Clean

Rust Resistant

Cleaning Method: Manual

Volume: 30L / 30 KG

Usage: For Milking Cows And Collecting Milk

Package Includes: 1 Milking Machine Bucket

Technical Parameters:

Mouth diameter	175mm
Bottom diameter	305mm
Height	540mm
Compatibility	Fits Most Milking Machines
Model	HL-B01
Usage	For Milking Cows And Collecting Milk
Item	Stainless Steel Milk Bucket / Milk Pail
Shape	Round
Volume	30L / 30 KG
Inlet Type	Top

Applications:

The HL-B01 Milking Machine Bucket is specifically crafted for use in scenarios where an Automatic Milk Extractor is employed. Its top

inlet type facilitates easy connection to the milking vacuum pump, ensuring efficient milk extraction processes. Standing at a height of 540mm, this bucket is suitable for accommodating a significant amount of milk during milking sessions. One of the standout features of this milking bucket is its durability. Made to withstand the rigors of daily milking operations, it is built to last. Additionally, its rust-resistant properties make it a reliable choice for long-term use. Furthermore, the manual cleaning method of the HL-B01 Milking Machine Bucket ensures that maintaining hygiene standards is convenient and straightforward. Farmers can easily clean and sanitize the bucket after each use, ensuring the health and safety of their livestock. Whether in a small-scale dairy farm or a large milk processing facility, the Chuangpu HL-B01 Milking Machine Bucket proves to be a valuable asset. Its compatibility with most milking machines, combined with its user-friendly features, makes it a practical choice for milking operations of varying scales.
