Product Description:

The Transparent Milking Bucket Group For Cow is an essential equipment for dairy farmers looking to streamline their milking process. This udder pumping bucket is designed to efficiently collect and store milk from dairy cattle, ensuring a hygienic and productive milking operation.

With a generous capacity of 25L, this milking machine bucket allows for the collection of a significant amount of milk before needing to be emptied. The transparent design enables easy monitoring of milk levels, ensuring timely emptying and cleaning to maintain milk quality. The 60:40 pulsation rate of this farm milk suction unit ensures gentle and effective milking, mimicking the natural milking process to prevent discomfort or injury to the dairy cattle. This pulsation rate is optimized for efficient milk flow while maintaining the health and well-being of the cows.

Featuring 3 lid ports, this dairy cattle milker offers versatility in use, allowing for easy attachment of milking machine components and accessories. The multiple ports enable seamless integration with milking machine systems, enhancing the overall milking efficiency on the farm.

Accepted payment methods for purchasing this udder pumping bucket include T/T, Paypal, and Western Union, providing convenience and flexibility for customers to complete their transactions securely and effortlessly. Whether you prefer traditional bank transfers or online payment platforms, you can choose the payment option that suits your preferences.
