

13mm/16mm/19mm Inner Diameter Milk Machine Rubber Tube For Dairy Farm

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP33
- Minimum Order Quantity: 1 Roll
- Price: Negotiable
- Packaging Details: Beaded Bag
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 Roll/Month

Product Specification

- Features: Flexible, Durable, Non-toxic
- Name: Rubber Milking Tube
- Length: 50 Meters For Each Roll
- Material: Food-grade Rubber
- Color: Black
- Temperature Range: -40°C To 120°C
- Outer Diameter: 24mm, 27mm, 32mm
- Model: HL-MP33
- Highlight: 13mm Milk Machine Rubber Tube,
16mm Milk Machine Rubber Tube,
19mm Milk Machine Rubber Tube

Product Description:

The Milking Machine Tube is a vital component for the efficient and seamless operation of milking machines in dairy farms and facilities. This high-quality vacuum tube is designed to withstand the demanding conditions of milking processes, ensuring reliable performance and durability.

With a working pressure of 0.4-0.5MPa, this Milking Machine Tube is engineered to handle the pressure required for milking operations, providing a consistent and steady flow of milk. The black color of the tube not only gives it a sleek and professional appearance but also helps in easy identification and maintenance.

The Milking Machine Tube comes in three different outer diameter options - 24mm, 27mm, and 32mm, allowing users to choose the most suitable size based on their specific milking machine requirements. This versatility in outer diameter ensures compatibility with various milking equipment setups, enhancing convenience and flexibility.

Featuring a temperature range of -40°C to 120°C, this Milking Machine Tube is designed to withstand extreme temperatures commonly encountered during milking processes. Whether in cold winter months or hot summer days, this tube remains resilient and reliable, ensuring smooth milking operations throughout the year.

The inner diameter of the Milking Machine Tube is available in three sizes - 13mm, 16mm, and 19mm, catering to different milking machine setups and configurations. The precise inner diameter dimensions contribute to the efficient flow of milk and vacuum, optimizing the milking process for maximum productivity.

Designed to be a vacuum tube, this Milking Machine Tube plays a crucial role in creating and maintaining the necessary vacuum pressure for milking equipment to function effectively. By securely sealing the vacuum system, this tube helps in maintaining optimum milking conditions, ensuring thorough and hygienic milking operations.

In addition to its primary function as a vacuum tube, the Milking Machine Tube can also serve as a pulse tube, facilitating the pulsation process in milking machines. This dual functionality enhances the versatility of this tube, making it a versatile and indispensable component in modern milking systems.

Overall, the Milking Machine Tube is a reliable, high-performance component that is essential for the smooth and efficient operation of milking machines in dairy farms. With its robust construction, precise dimensions, and versatile functionality, this tube is a valuable asset for dairy farmers and milk processing facilities looking to optimize their milking processes.

Features:

Product Name: Milking Machine Tube

Name: Rubber Milking Tube

Model: HL-MP33A

Outer Diameter: 24mm, 27mm, 32mm

Length: 50 Meters For Each Roll

Temperature Range: -40°C To 120°C

Technical Parameters:

Model	HL-MP33A
Temperature Range	-40°C To 120°C
Length	50 Meters For Each Roll
Color	Black
Name	Rubber Milking Tube
Working Pressure	Milking With 0.4-0.5MPa
Material	Food-grade Rubber
Features	Flexible, Durable, Non-toxic
Outer Diameter	24mm,27mm,32mm
Inner Diameter	13mm/16mm/19mm

Applications:

The Chuangpu Rubber Milking Tube, model HL-MP33A, is a versatile and essential component for automated milking systems. With its inner diameter options of 13mm, 16mm, and 19mm, this milking tube is suitable for various milking machine setups. Originating from China, this durable and non-toxic milking tube is designed to withstand the demands of daily milking operations. The flexibility of the tube allows for easy installation and maneuverability, while its length of 50 meters per roll ensures ample coverage for different milking setups.

The Chuangpu Rubber Milking Tube, HL-MP33A, is ideal for a wide range of product application occasions and scenarios:

1. Dairy Farms: The milking tube is perfect for use in dairy farms equipped with automated milking systems. It facilitates the efficient extraction of milk from dairy animals, ensuring a smooth and hygienic milking process.
 2. Milk Processing Plants: The tube is suitable for connecting milk extraction pipes to processing equipment in milk processing plants. Its durability and flexibility make it a reliable component for transporting milk within the facility.
 3. Livestock Shows and Exhibitions: The Chuangpu Rubber Milking Tube is a valuable accessory for showcasing automated milking systems at livestock shows and exhibitions. Its non-toxic nature ensures the safety and quality of the milk during demonstrations.
 4. Agricultural Research Facilities: Researchers and scientists can utilize this milking tube in agricultural research settings to study milking efficiency and milk extraction techniques. The tube's various inner diameter options cater to different research requirements.
- Overall, the Chuangpu Rubber Milking Tube, model HL-MP33A, serves as a reliable and indispensable component in the realm of automated milking systems. Its features of flexibility, durability, and non-toxicity make it a preferred choice for milk extraction pipes in diverse settings.
