

1530x320x180mm Lightweight Plastic Feeding Trough for Goat and Sheep

Our Product Introduction

for more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China Mailand
- Brand Name: HL
- Model Number: HL-MP13B
- Minimum Order Quantity: 1 PCS
- Price: Negotiable
- Packaging Details: Air Bubble Packaging
- Delivery Time: 7-10 working days
- Payment Terms: T/T, Western Union,Paypal
- Supply Ability: 500PCS /Month

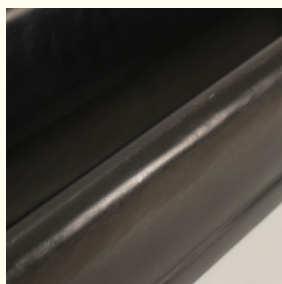

Product Specification

- Item: Feeding Trough
- Animal: Dairy Goat And Sheep
- Material: PE
- Size: 1530x320x180mm, 870x300x160mm
- Weight: 5.75KG , 3.45KG
- Highlight: cattle drinking bowl, dairy cow mattresses

Product Description:

Plastic feeding troughs are commonly used feeding equipment in sheep farms, featuring lightweight, corrosion-resistant, and easy-to-clean features. They are suitable for different stages of feeding needs such as fattening sheep, ewes, and lambs.

This plastic trough has a simple design that allows feeding from both sides, greatly increasing product utilization and reducing usage costs.

Why use a feed trough?

In large-scale livestock farming such as cattle and sheep, feed troughs (feeding troughs) are essential facilities, and their role goes beyond simply "holding feed." Here are the 7 main reasons why feed troughs are essential in professional farming.

1. Reduce feed waste and lower farming costs
2. Ensure animal health and prevent diseases
3. Precision Nutrition Management to Improve Production Performance
4. Adapt to different feed types
5. Improve Farm Management Efficiency
6. Enhanced environmental adaptability
7. Long-term Economic Profit Analysis

Whether it's a home ranch or a large-scale farm, choosing the right feed trough (such as plastic, stainless steel, concrete) can significantly improve feed utilization rate, animal health, and economic efficiency

Specification:

Item	Feeding Trough
Model	HL-MP13B
Material	Plastic, PE poly ethylene
Color	Black
Size	1530x320x180mm, 870x300x160mm
Animal	Goat, Sheep

The core advantage of Plastic Feeding Troughs:

Lightweight and durable: Made of high-density polyethylene (HDPE), impact-resistant, acid and alkali resistant.

Anti-corrosion: Does not rust, suitable for humid environments like silage and wet mixtures.

Easy to clean: Smooth surface with no dead corners, reducing the risk of feed mold.

Low cost: Compared to stainless steel or concrete tanks, the price is more economical, suitable for small and medium-sized farms.

Usage and Maintenance Suggestions:

Daily Cleaning: Timely removal of residual feed to prevent fermentation and spoilage.

Regular disinfection: Rinse with sodium hypochlorite or peroxyacetic acid weekly

Avoid exposure to sunlight: Prolonged UV exposure can accelerate aging; it is recommended to store in a shaded area.

Winter frost protection: In extremely cold regions, you can choose the thickened type or for indoor use.

Recommended Applicable Scenarios:

Small and Medium Sheep Farms: Low Cost, Flexible Adjustment

Lamb Rearing: Lightweight and Anti-Collision, Reduces Harm

Wet mix/forage: corrosion-resistant, easy to clean
