

Flexible Silicone Milking Machine Hose With 16x26mm For Easy Maneuvering And Cleaning

Our Product Introduction

more products please visit us on mobilemilkingmachine.com

Basic Information

- Place of Origin: China
- Brand Name: Chuangpu
- Model Number: HL-MP35C
- Minimum Order Quantity: 1 Roll
- Price: Negotiable
- Packaging Details: Carton
- Delivery Time: 3-5 working days
- Payment Terms: T/T, Western Union,
- Supply Ability: 5000 Roll/Month

Product Specification

- Features: Flexible, Durable, Non-toxic
- Color: White
- Working Pressure: Milking With 0.4-0.5MPa
- Model: HL-MP35C / HL-MP35D
- Outer Diameter: 24mm, 26mm
- Inner Diameter: 14mm, 16mm
- Material: Food-grade Silicone
- Temperature Range: -40°C To 120°C
- Highlight: **Easy Maneuvering Silicone Milking Machine Hose**
, 16x26mm Silicone Milking Machine Hose,
Cleaning Silicone Milking Machine Hose

Product Description:

The Milking Machine Tube is an essential component designed for the efficient operation of milking machines in dairy farms. This high-quality Dairy Farm Milking Hose is specially crafted to facilitate the seamless transfer of milk from the source to the storage containers with precision and reliability.

Available in a classic White color, this Milking Machine Tube is compatible with various models, including HL-MP35C and HL-MP35D, ensuring versatility and flexibility in usage across different milking machine setups.

The primary Application of this Milk Machine Tube is to serve as a vital link in the automated milk collection process on dairy farms. By connecting this tube to the milking machine and the storage tanks, dairy farmers can streamline the milk extraction process and maintain a hygienic environment during milking operations.

With an Outer Diameter of either 24mm or 26mm, this Milking Machine Tube is designed to deliver milk efficiently without any leaks or spills. The precise sizing of the tube ensures a snug fit with the milking machine components, enabling a smooth flow of milk from the source to the collection point.

Whether you are a small-scale dairy farmer or managing a large commercial dairy operation, this Milk Machine Tube offers a reliable solution for handling milk transfer with ease. Its sturdy construction and durable materials make it suitable for long-term use in demanding farm environments.

Investing in a high-quality Milking Machine Tube like this one can significantly enhance the productivity and efficiency of your dairy farm operations. By incorporating this Dairy Farm Milking Hose into your milking setup, you can optimize the milk collection process and minimize wastage, ultimately leading to higher yields and profitability.

In conclusion, the Milking Machine Tube serves as a crucial link in the dairy farm ecosystem, enabling dairy farmers to harness the benefits of automation and modern technology in milk collection. With its reliable performance, precise sizing, and compatibility with various milking machine models, this tube is the ideal choice for dairy farmers looking to streamline their milking operations and maximize productivity.

Features:

Product Name: Milking Machine Tube

Working Pressure: Milking With 0.4-0.5MPa

Usage: For Delivering Milk

Material: Food-grade Silicone

Name: Silicone Milking Tube

Color: White

Technical Parameters:

Attribute	Value
Name	Silicone Milking Tube
Features	Flexible, Durable, Non-toxic
Outer Diameter	24mm,26mm
Model	HL-MP35C / HL-MP35D
Color	White
Working Pressure	Milking With 0.4-0.5MPa
Temperature Range	-40°C To 120°C
Length	50 Meters For Each Roll
Material	Food-grade Silicone
Inner Diameter	14mm,16mm

Applications:

The Silicone Milking Tube by Chuangpu, model number HL-MP35C, is a high-quality product designed for use in milking machines on dairy farms. Originating from China, this durable tube is suitable for a variety of application occasions and scenarios. One key application of this tube is as a vacuum hose in milking machines. Its flexibility and temperature resistance make it ideal for use in the milking process, ensuring efficient and hygienic milk extraction. Additionally, the Silicone Milking Tube can be used as milking device tubing, connecting various components of the milking machine to facilitate the smooth flow of milk from the cow to the storage container. Its model HL-MP35C is specifically designed for this purpose, offering reliable performance under varying temperature conditions ranging from -40°C to 120°C. Moreover, this tube can serve as a pulse tube in milking systems, helping to regulate the pulsation rate during the milking process for optimal milk extraction. Its model HL-MP35D provides a similar functionality, ensuring consistent and controlled milk delivery. Whether it is used in a small-scale dairy farm or a large commercial operation, the Silicone Milking Tube from Chuangpu is a versatile and essential component for delivering milk efficiently. Its durable construction and compatibility with milking machines make it a valuable asset for dairy farmers seeking reliable and high-performance tubing solutions.
