Quick Details:

- 0.9L farm drinking water bowl
- hard plastic water bowl water basin
- sheep and goat drinking bowl for water feeding
- food grade material automatic drinking and feeding water

Features of Plastic Sheep Water Bowl
1. Core Features
Lightweight and easy to carry

The plastic material is lightweight, suitable for mobile grazing or temporary water points; it can be installed or relocated by a single person.
Economical and affordable

The cost is lower than metal or ceramic waterers, suitable for small to medium-sized farmers or ranches with limited budgets.
Rust-resistant and corrosion-proof

Plastic does not rust and is resistant to acids and alkalis, suitable for environments with long-term contact with water and feed additives.
Diverse Designs

Can be matched with float valve, automatic water replenishment system, or designed as multi-compartment shared type (suitable for group breeding).
Winter Frost Protection

Some thickened plastic bowls have better frost resistance (but extreme cold still requires heating equipment).
2. Applicable Scenarios
Sheep Herding: Portable design makes it easy to move with the sheep flock.
Lamb feeding: Lightweight and low-profile, suitable for lambs to drink from while looking down.
Temporary fence: Quick deployment, no need for permanent installation.
3. Precautions
Durability Issues

Long-term exposure to sunlight may cause aging and cracking (selecting UV protection material can extend lifespan).
Adult sheep chewing may cause damage, requiring regular inspection and replacement.
Cleaning Requirements

Plastic can easily accumulate algae and needs frequent cleaning (it is recommended to choose a light-colored bowl for easy observation of dirt).
Stability

It is lightweight and easy to tip over; it can be fixed on a stand or filled with sand to increase weight.

Specification:

Item	Drinking Water Bowl (with plastic valve)
Model	HL-MP58E
Material	PP propene polymer, Plastic
Color	Green
Capacity	0.9L
Weight	570g
Thickness	7mm
Size	190mm x 185mm x 160mm
Packing	Carton Packaging

Application:

The drinking water bowl is one of most important feeding water equipment which could replenish the supply of drinking water for animals.

Automatic Water Replenishing Bowl: Connect to water pipe with float valve to control water level.
